Task 1: Local and Remote Commits — Merge and Rebase

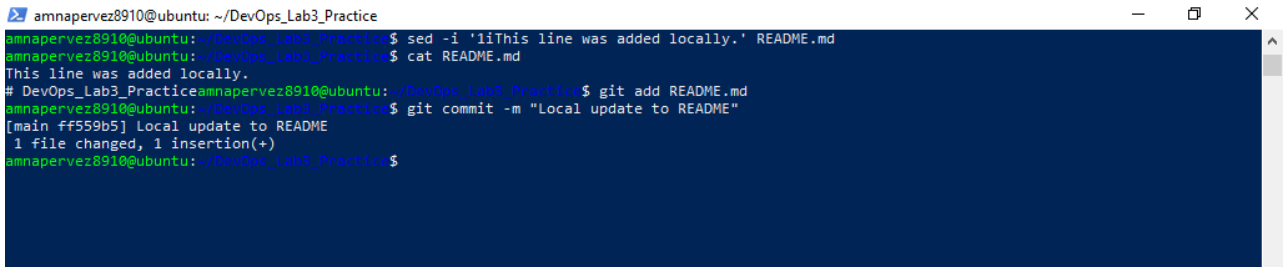

remote_edit.png

Remote README update committed on GitHub.

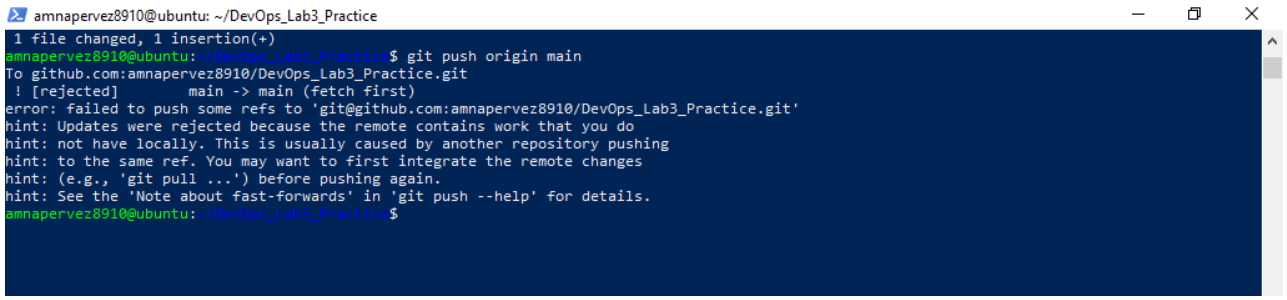

Task 1: Local and Remote Commits — Merge and Rebase (continued)

local_commit.png

Local README change staged and committed.

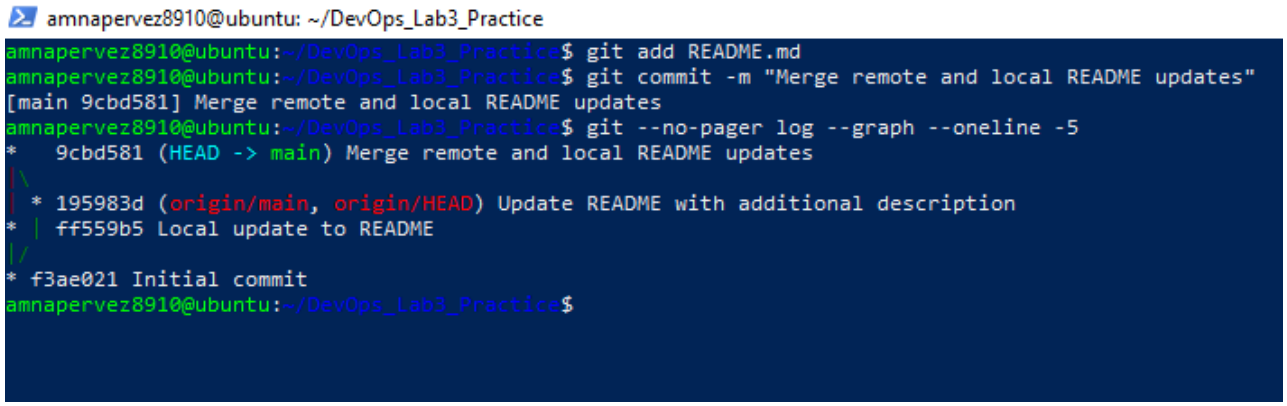

push_error.png

Push rejected because the remote contains additional commits.

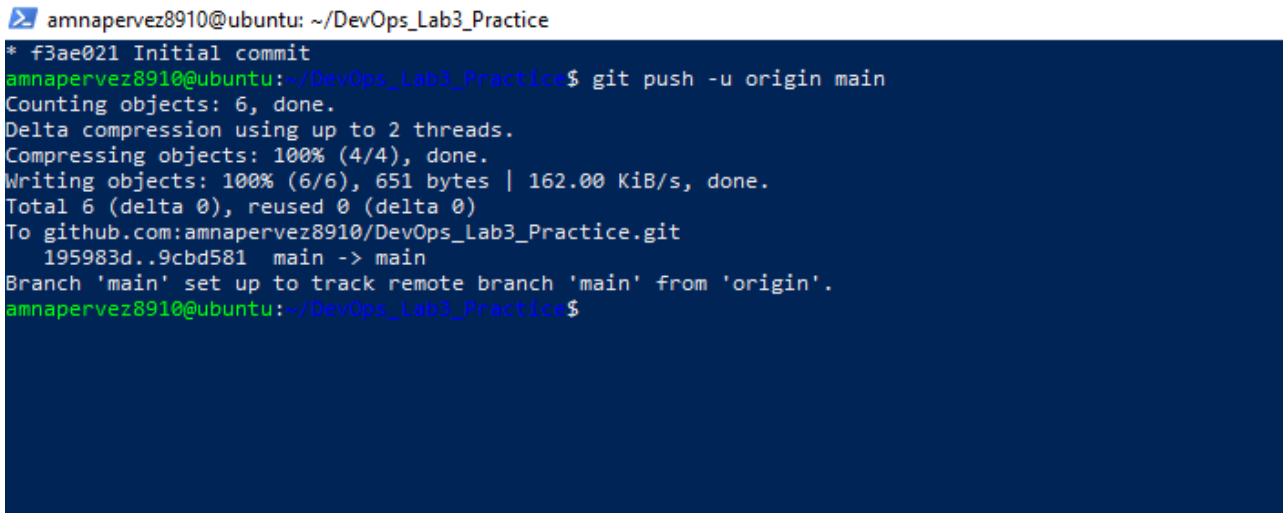

Task 1: Local and Remote Commits — Merge and Rebase (continued)

merge_commit.png

Local and remote updates integrated in a merge commit.

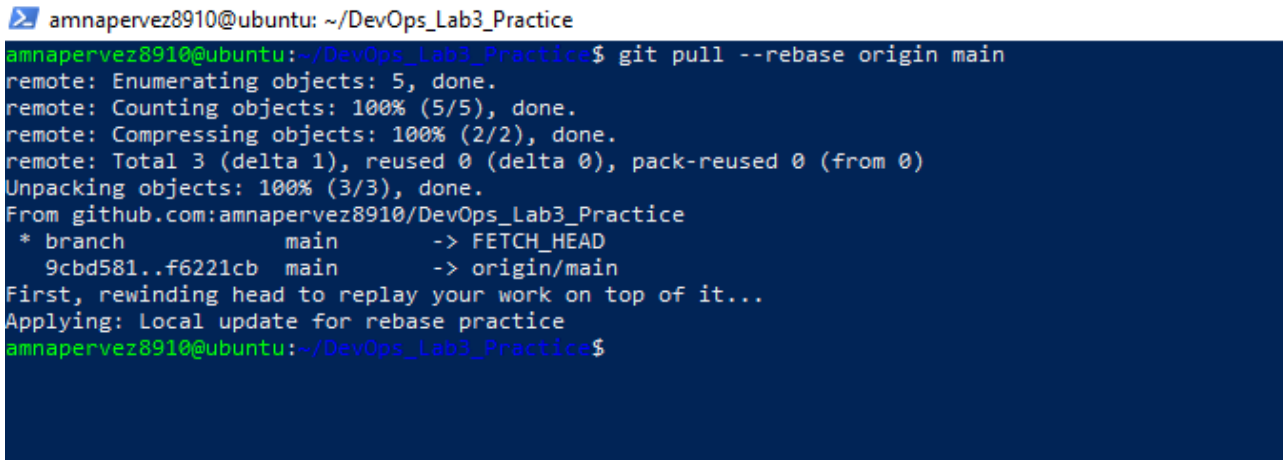

push_after_merge.png

Merged history successfully pushed to GitHub.

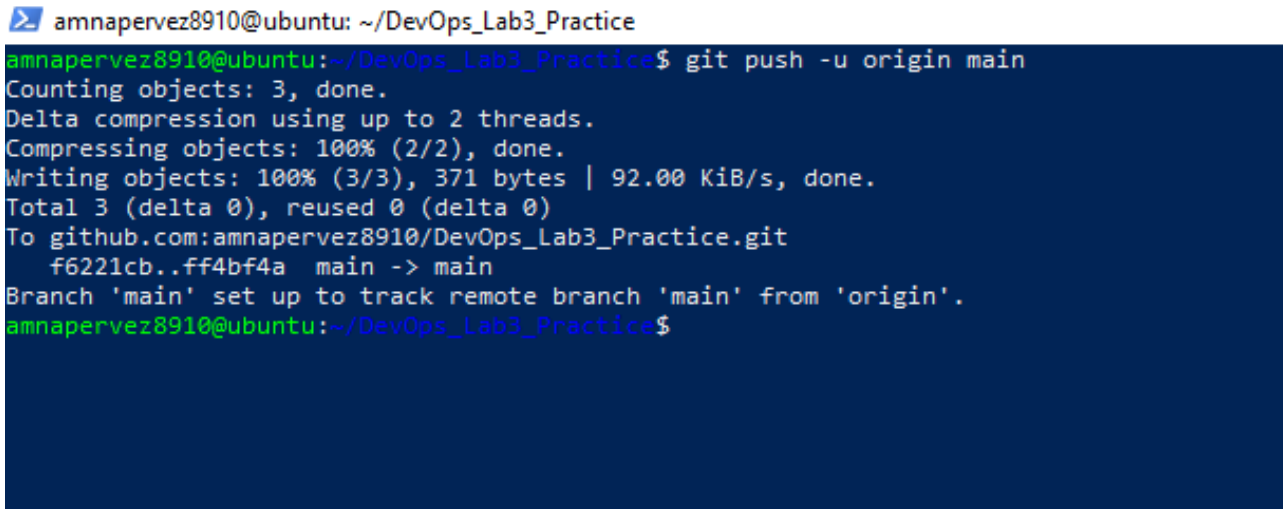

Task 1: Local and Remote Commits — Merge and Rebase (continued)

rebase_pull.png

Local commit replayed on top of the remote update.

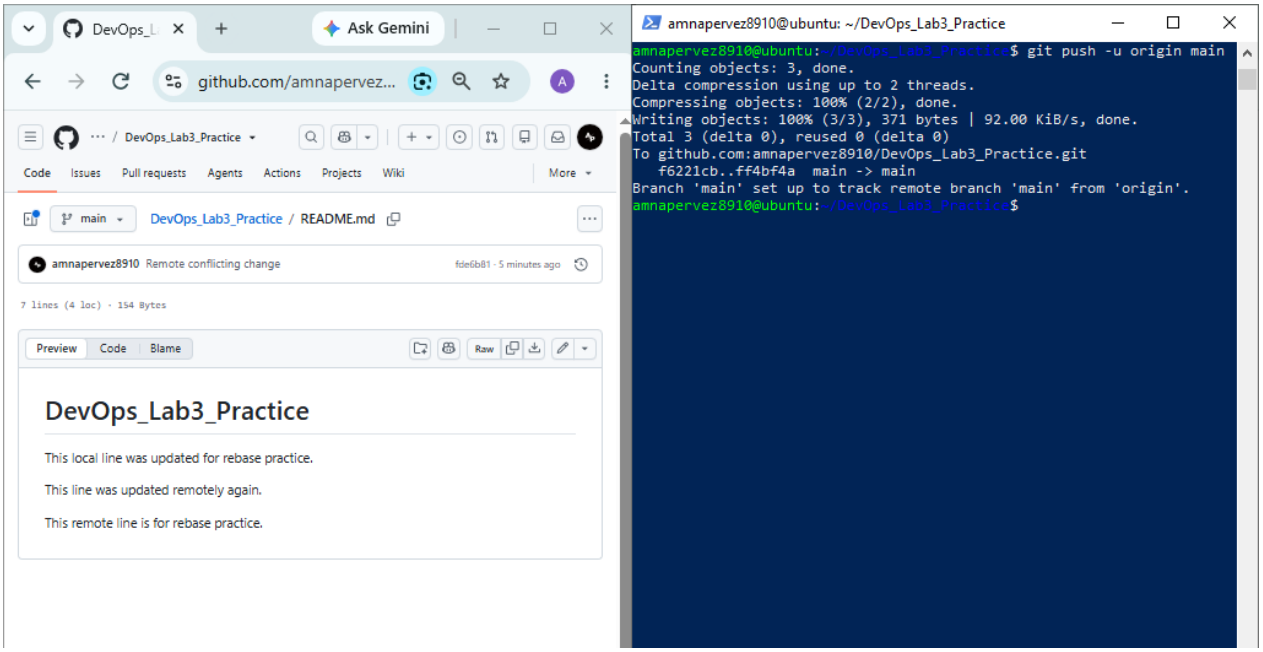

push_after_rebase.png

Rebased history successfully pushed.

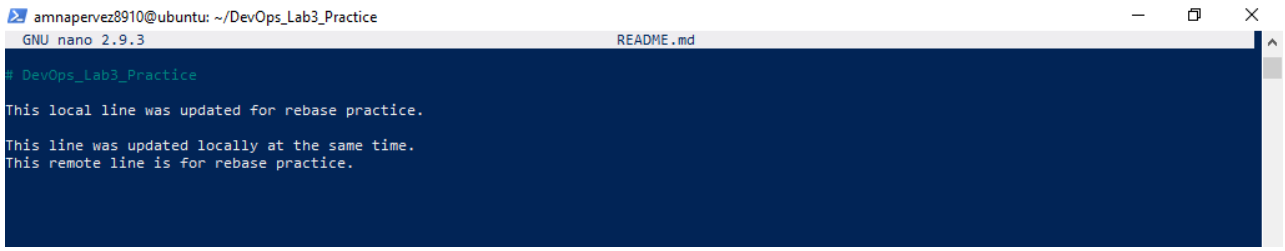

Task 2: Manual Conflict Resolution

remote_conflict_edit.png

Conflicting README change committed remotely.

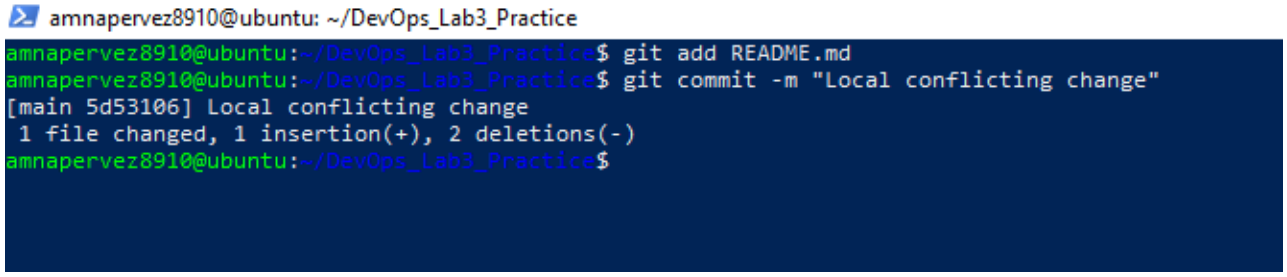

local_conflict_edit.png

The same README line edited differently in the local editor.

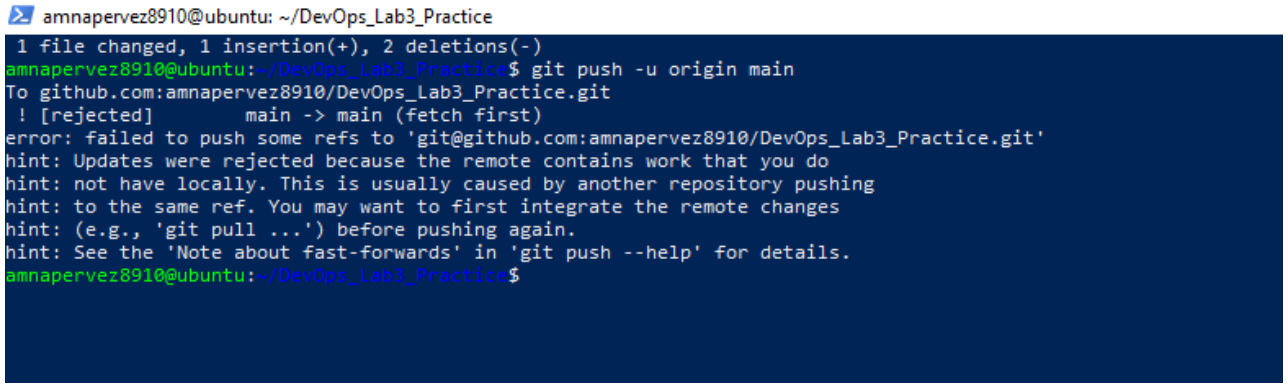

Task 2: Manual Conflict Resolution (continued)

local_conflict_commit.png

Local conflicting change committed.

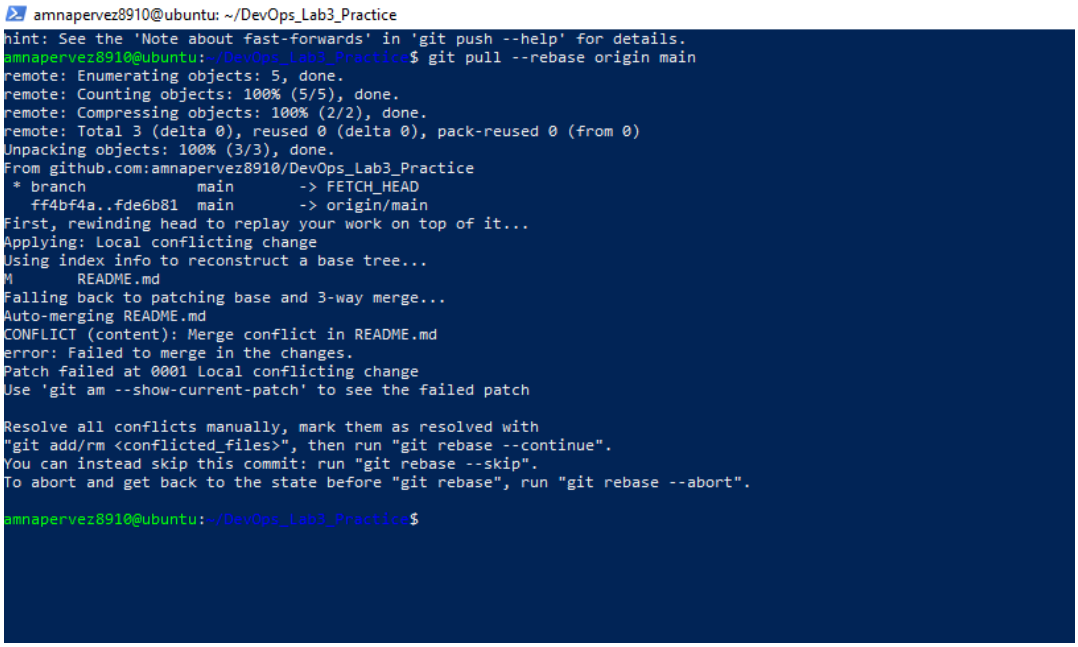

conflict_push_error.png

Push rejected while remote changes are missing locally.

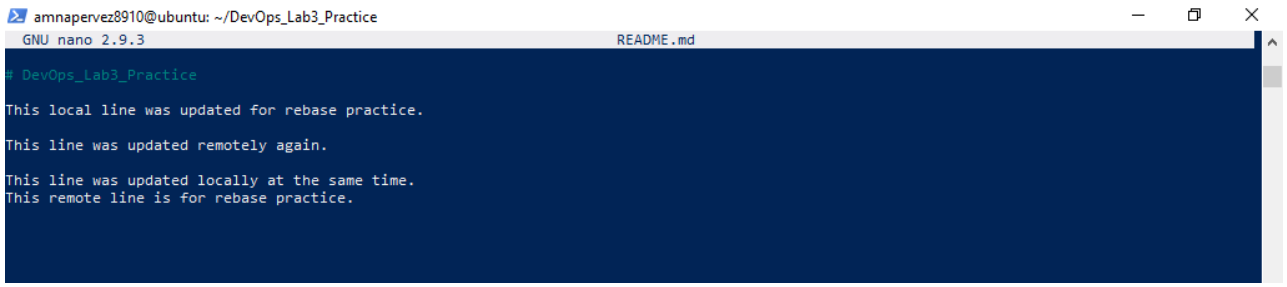

Task 2: Manual Conflict Resolution (continued)

conflict_message.png

Rebase paused because README changes conflict.

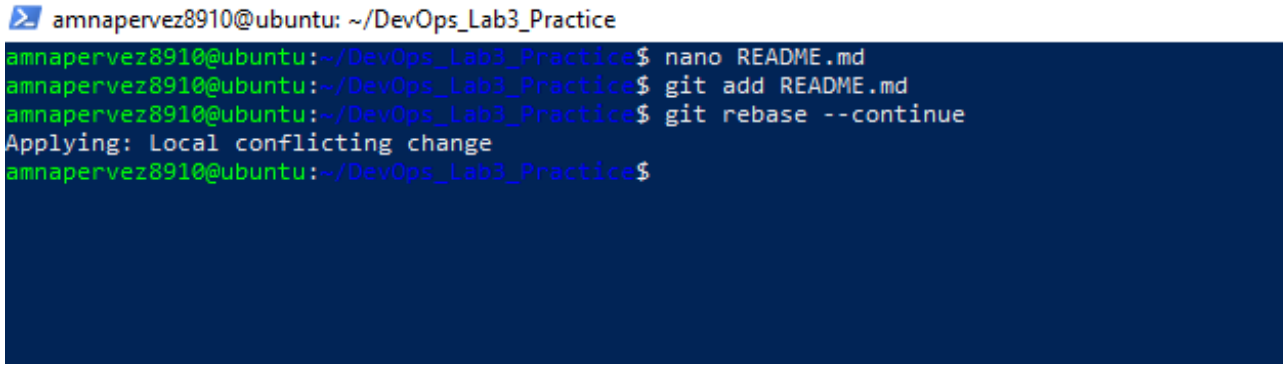

resolved_readme.png

Conflict markers removed and both contributions preserved.

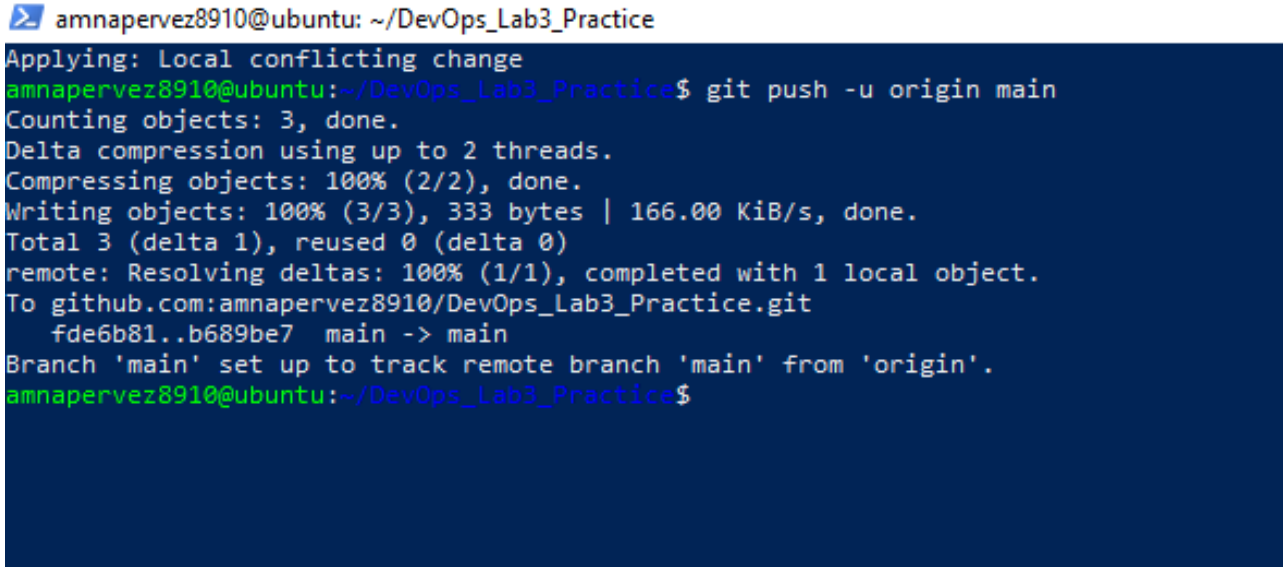

Task 2: Manual Conflict Resolution (continued)

rebase_continue.png

Resolved README staged and rebase continued.

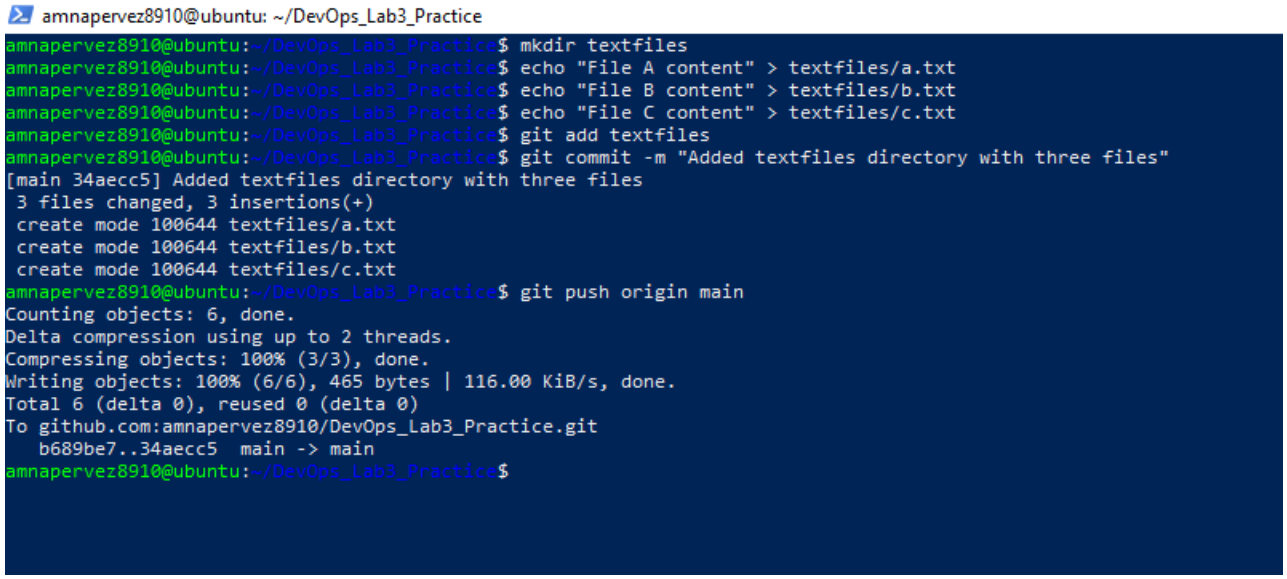

push_after_resolve.png

Resolved changes successfully pushed to main.

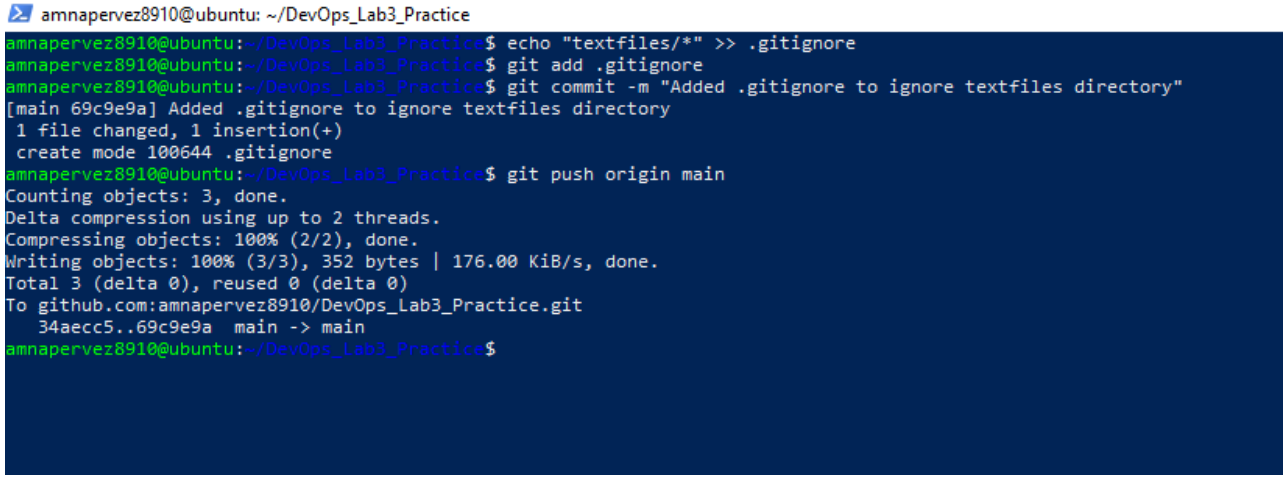

Task 3: Ignored and Tracked Files

push_textfiles.png

Three text files committed and pushed.

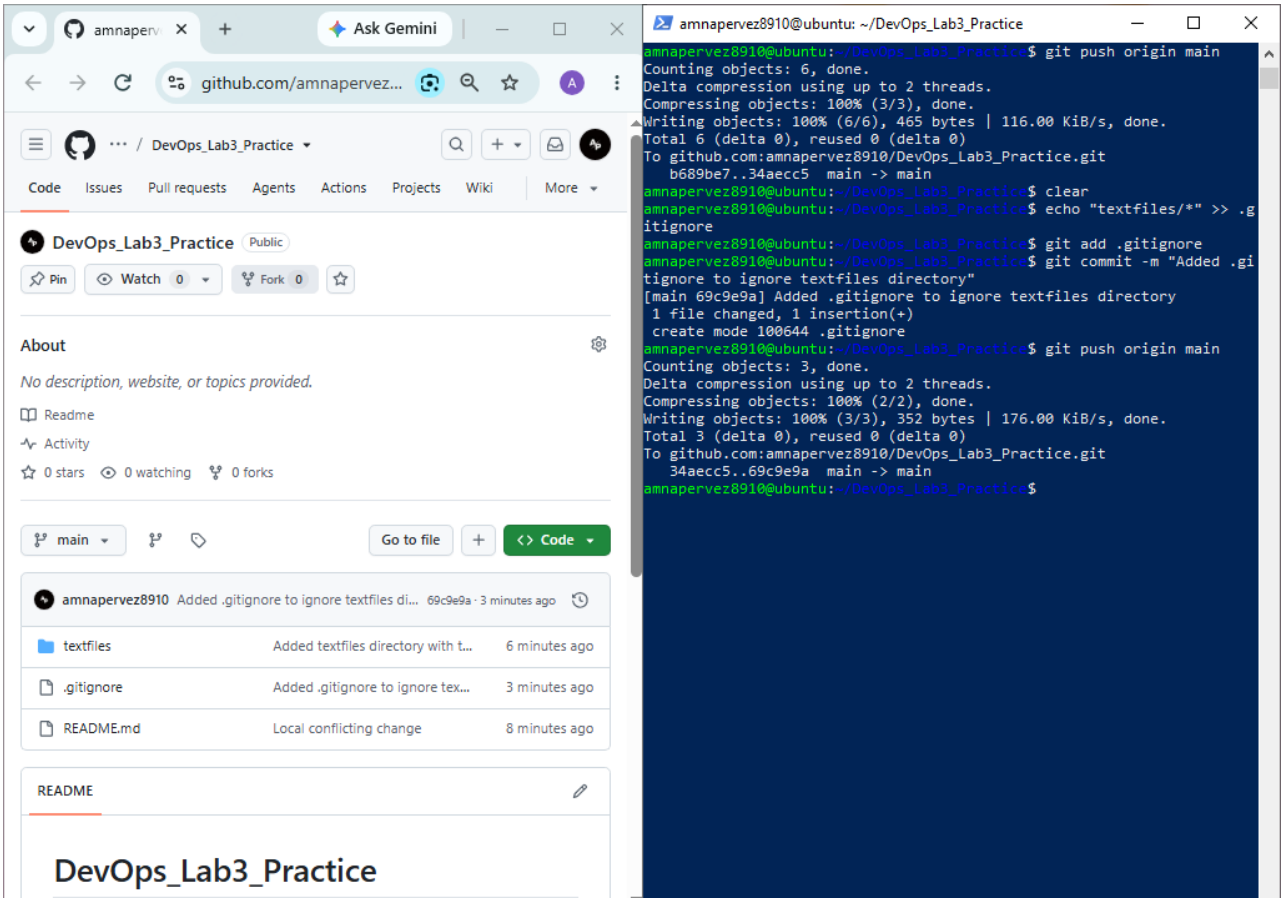

gitignore_push.png

Ignore rule added to .gitignore and pushed.

Task 3: Ignored and Tracked Files (continued)

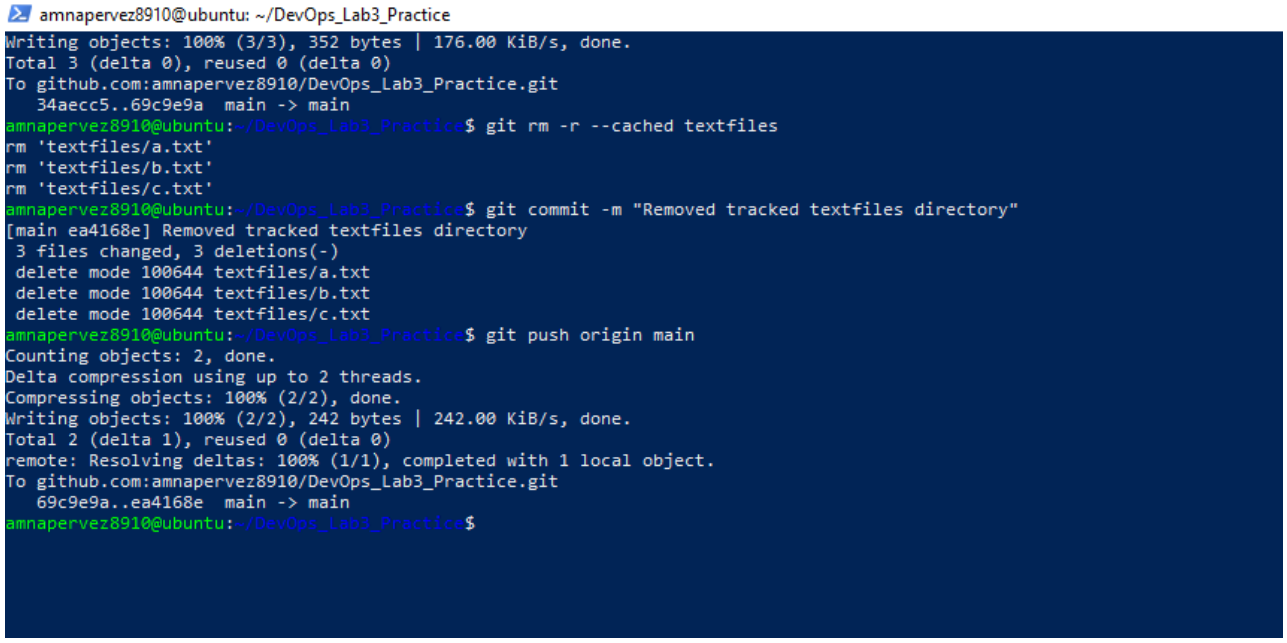

repo_still_has_textfiles.png

Previously tracked textfiles remain visible after adding the ignore rule.

Task 3: Ignored and Tracked Files (continued)

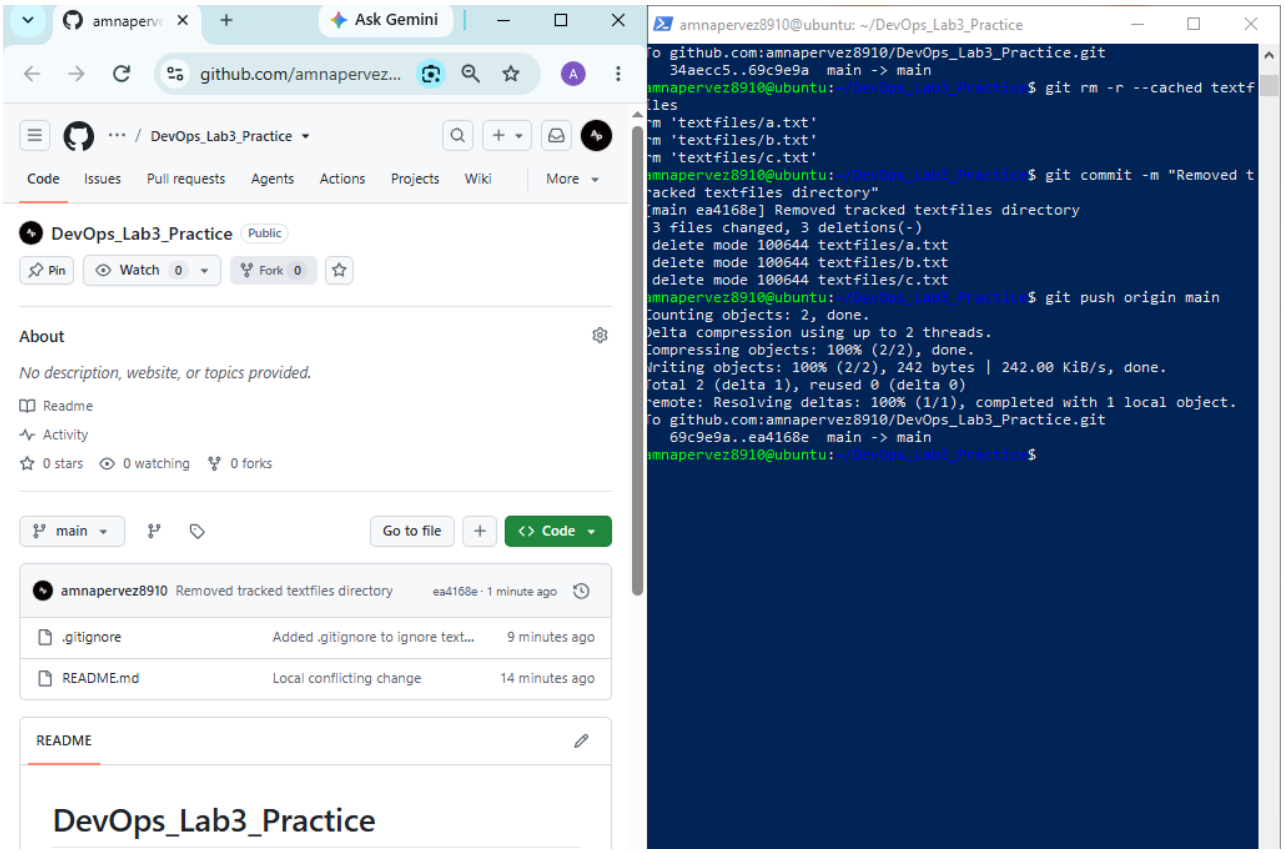

rm_cached_push.png

Files removed from the Git index, committed and pushed.

Task 3: Ignored and Tracked Files (continued)

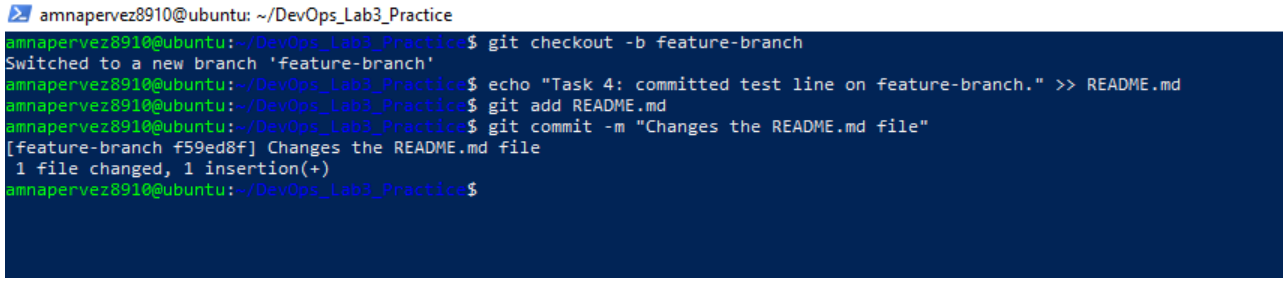

repo_textfiles_removed.png

GitHub file list confirms removal of the tracked textfiles folder.

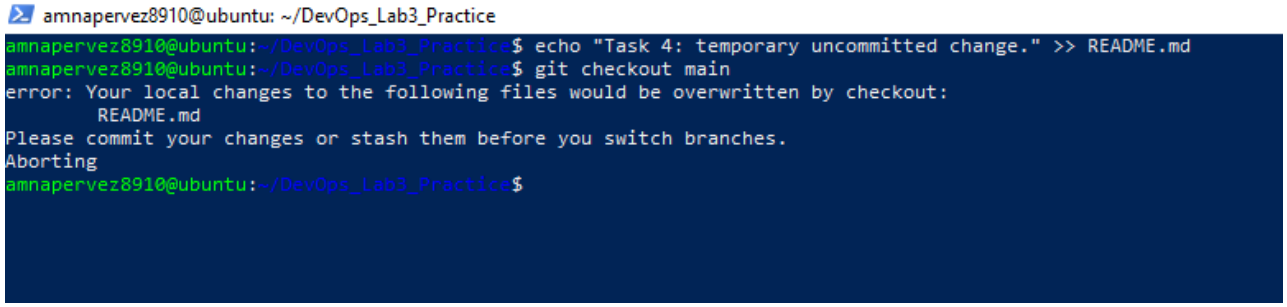

Task 4: Stashing Uncommitted Changes

modified_readme.png

Feature branch created and initial README change committed.

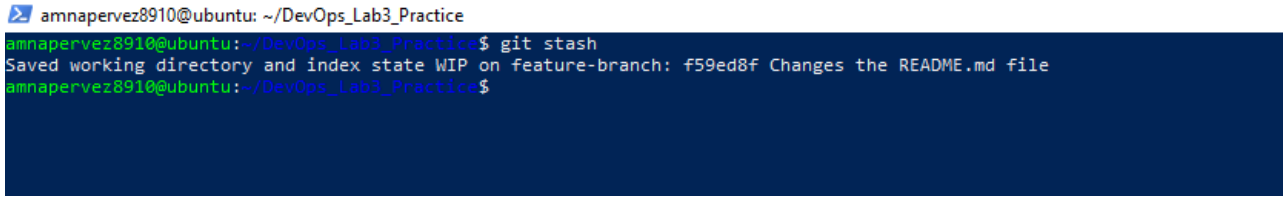

checkout_error.png

Branch checkout blocked to protect uncommitted README edits.

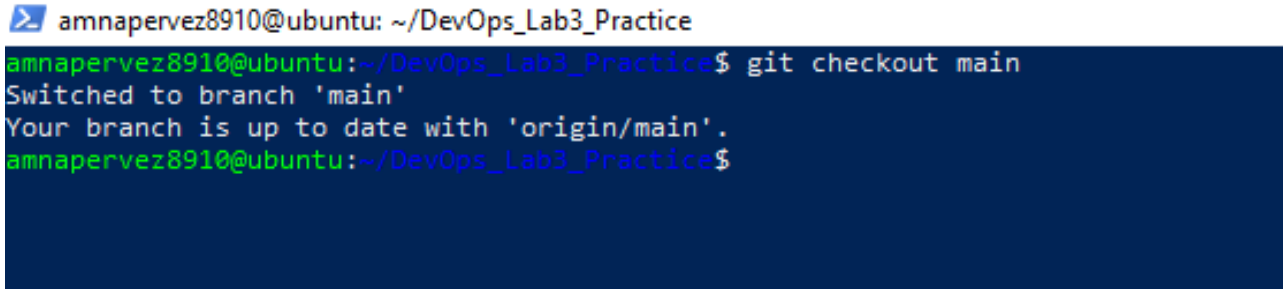

Task 4: Stashing Uncommitted Changes (continued)

stash_command.png

Uncommitted changes saved using git stash.

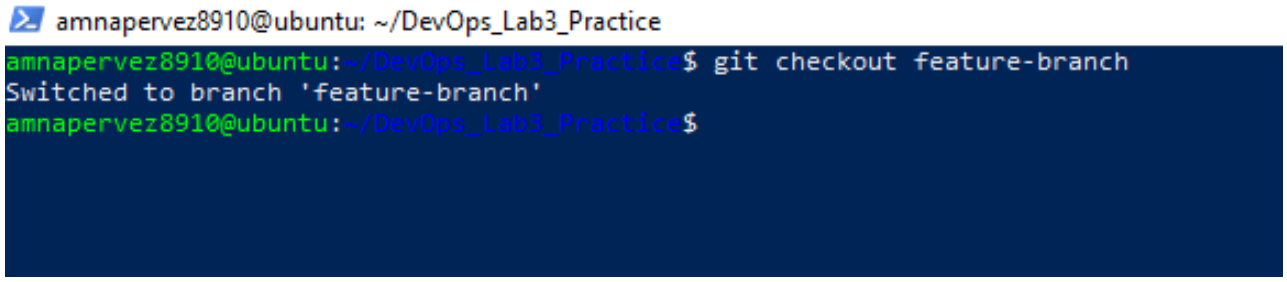

branch_switched.png

Checkout to main succeeds after stashing.

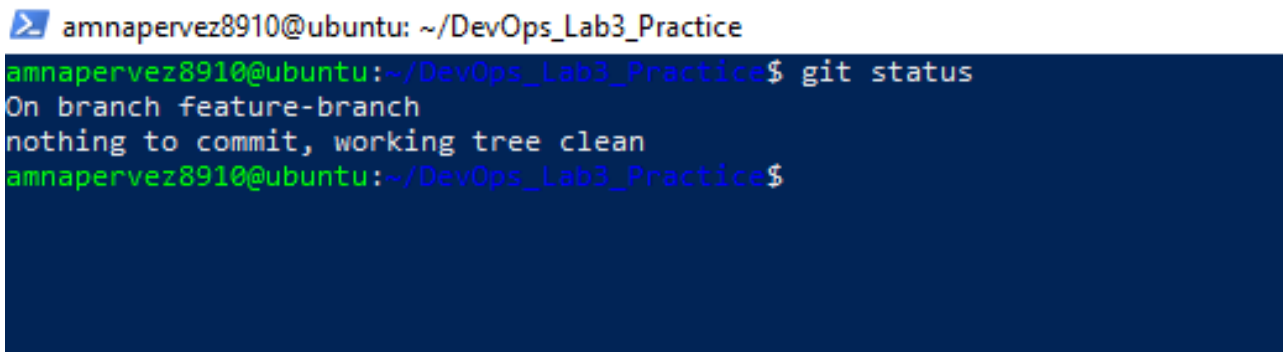

Task 4: Stashing Uncommitted Changes (continued)

back_to_feature.png

Returned to feature-branch.

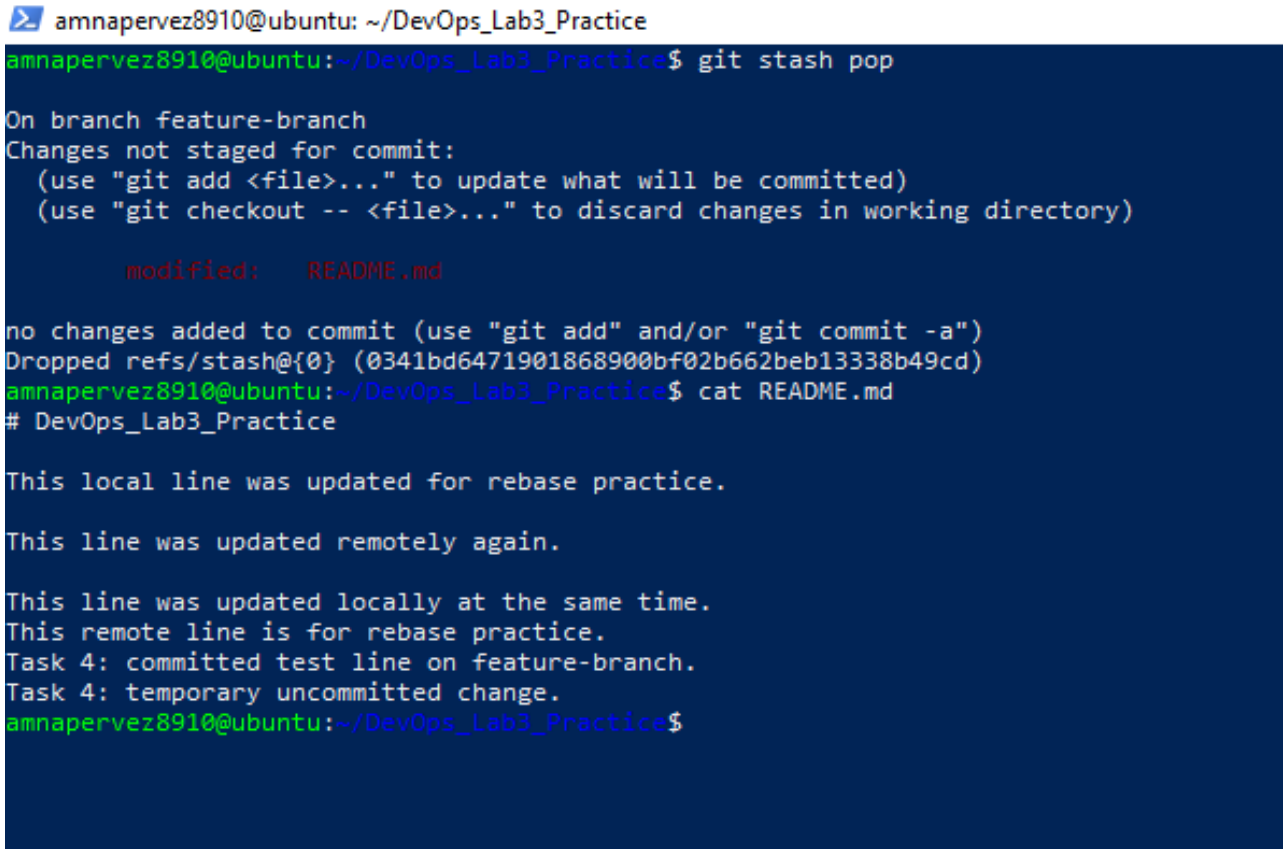

status_clean.png

Clean working tree verified before restoring the stash.

Task 4: Stashing Uncommitted Changes (continued)

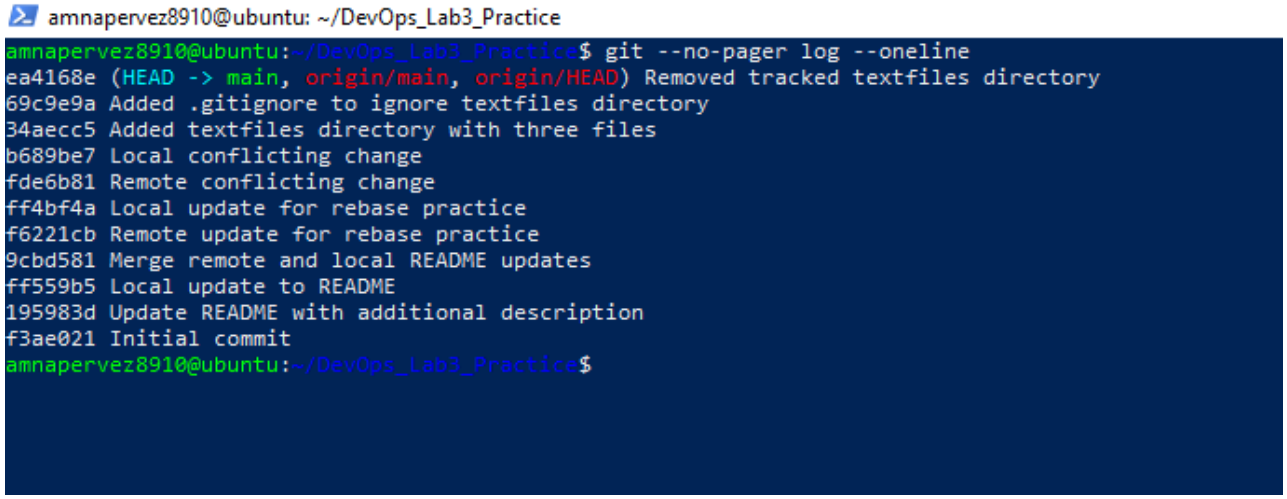

stash_pop.png

Stashed changes restored and README contents verified.

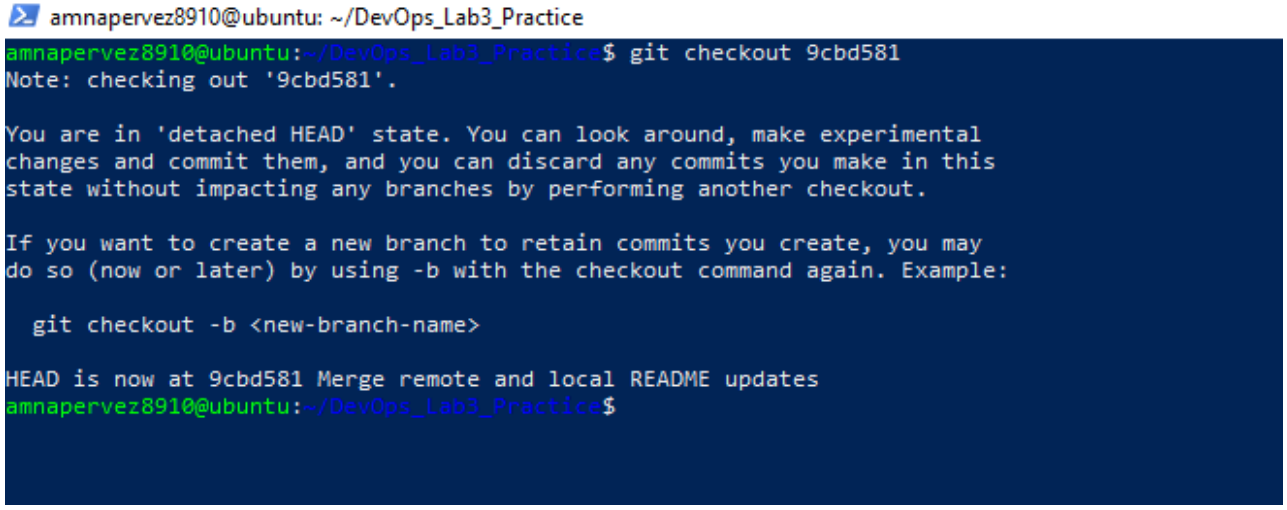

Task 5: Inspecting a Previous Commit

log_before_checkout.png

Commit history inspected before checking out an earlier revision.

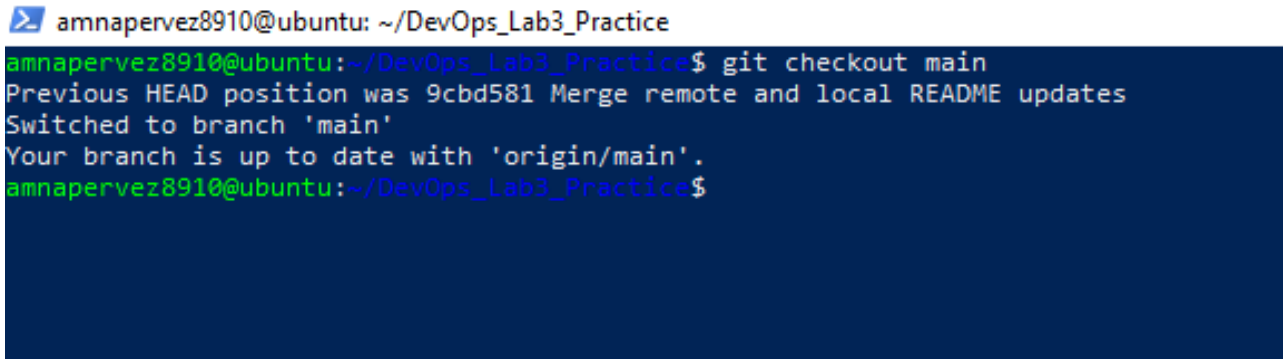

detached_head.png

Earlier commit checked out in detached HEAD state.

Task 5: Inspecting a Previous Commit (continued)

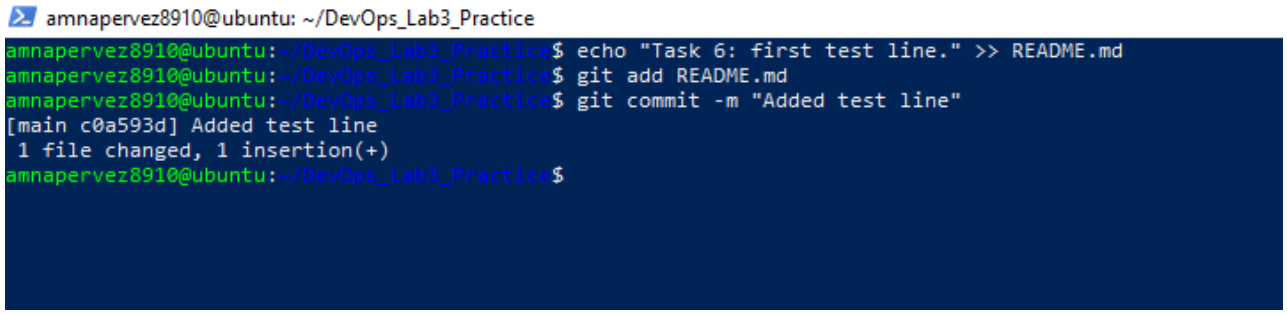

back_to_main.png

Returned safely to main.

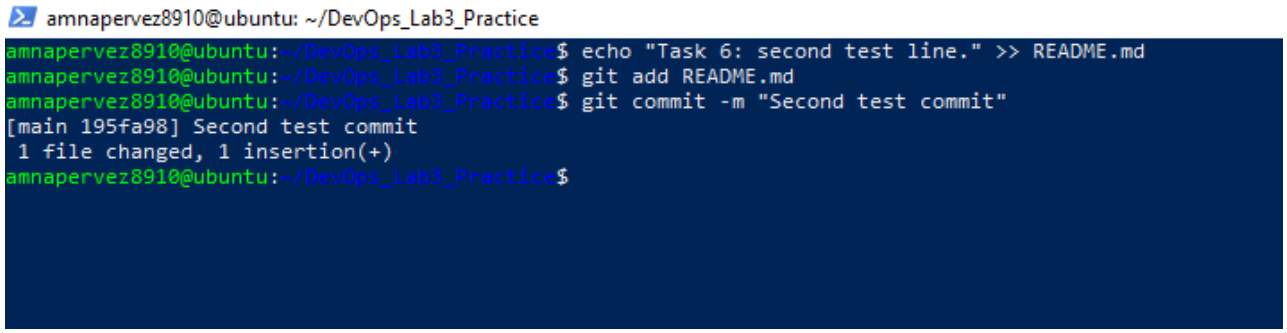

Task 6: Soft and Hard Reset

first_commit.png

First test line committed.

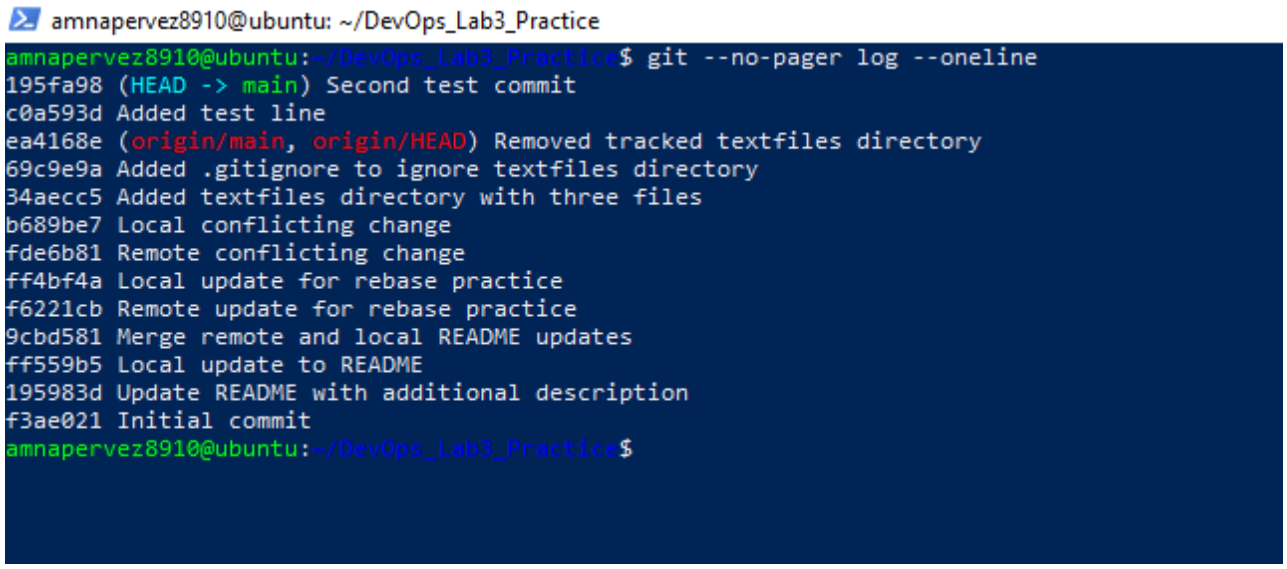

second_commit.png

Second test line committed.

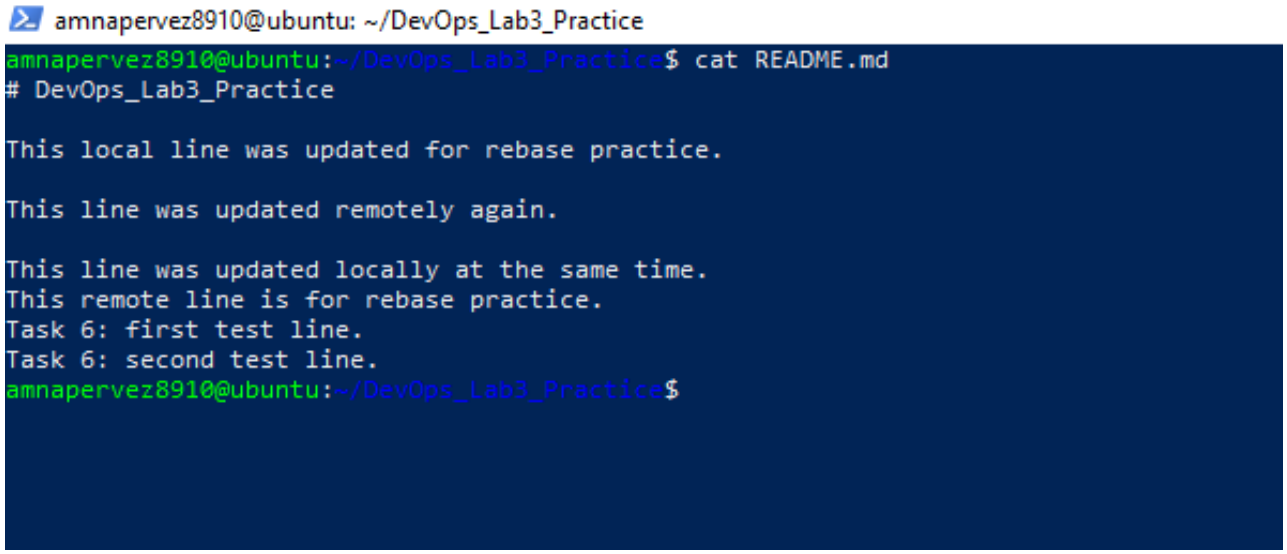

Task 6: Soft and Hard Reset (continued)

log_before_reset.png

Both test commits visible before resetting.

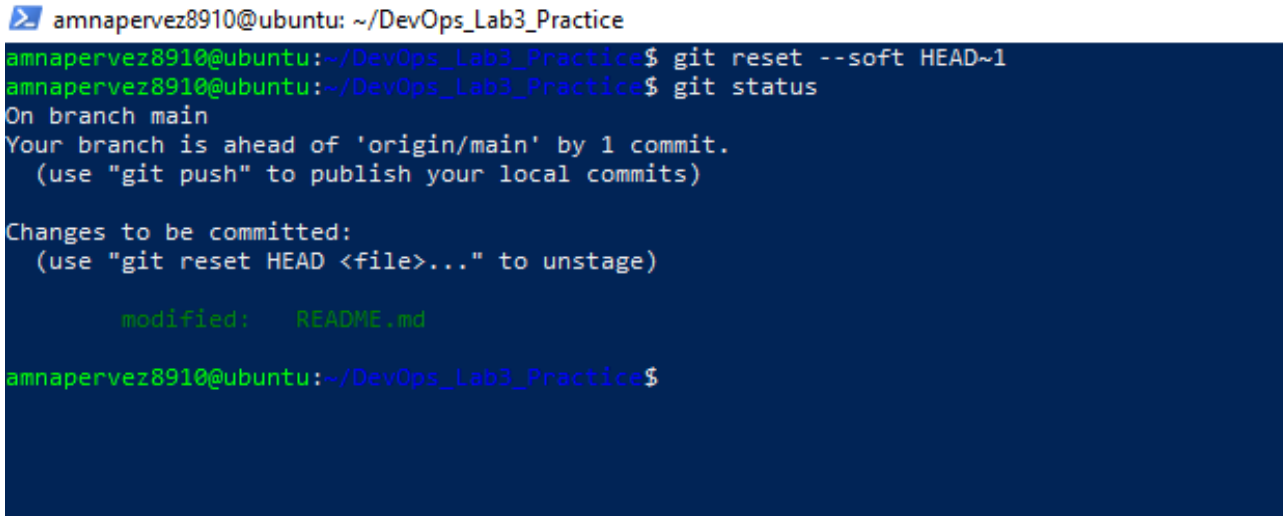

file_before_reset.png

Both test lines present before resetting.

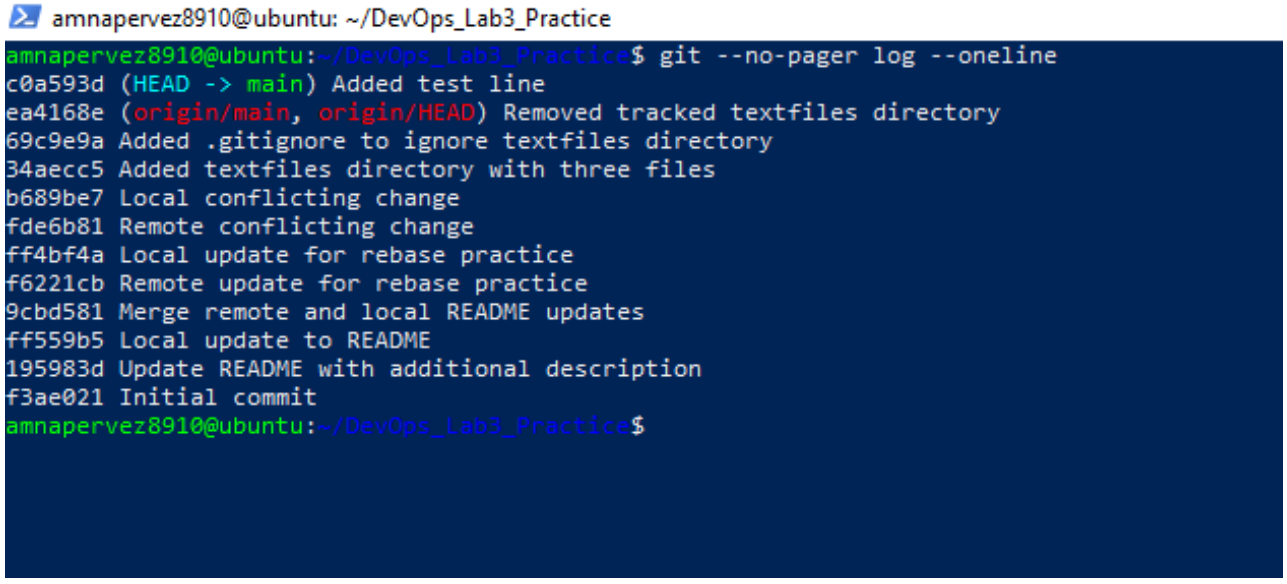

Task 6: Soft and Hard Reset (continued)

soft_reset.png

Soft reset removes the latest branch commit and retains staged changes.

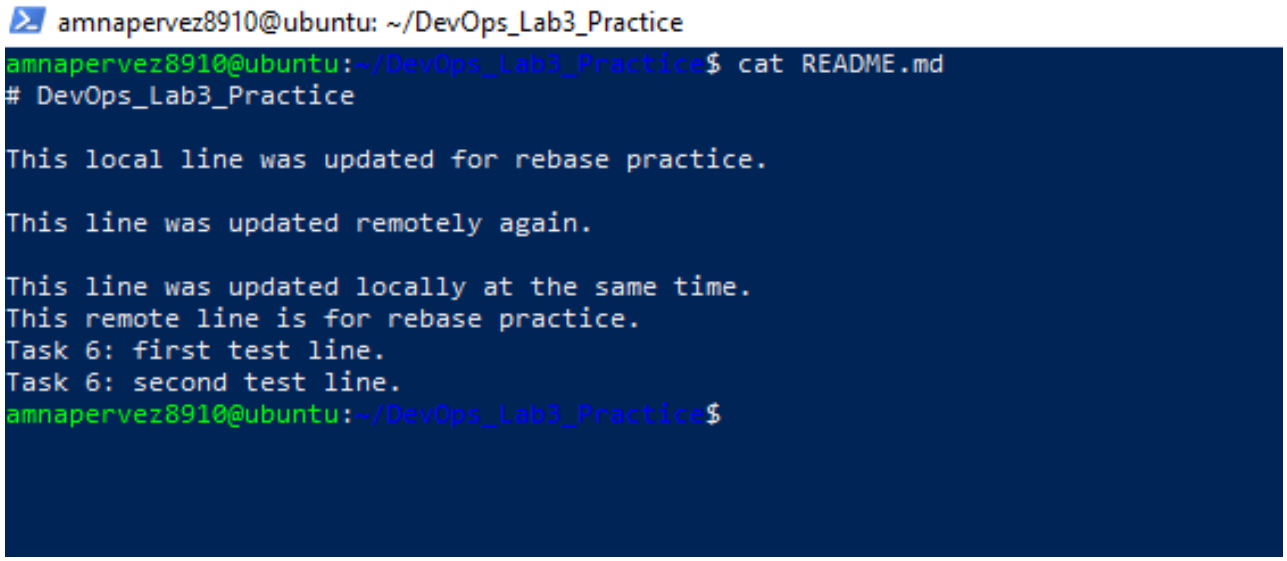

log_after_soft_reset.png

Branch history checked after the soft reset.

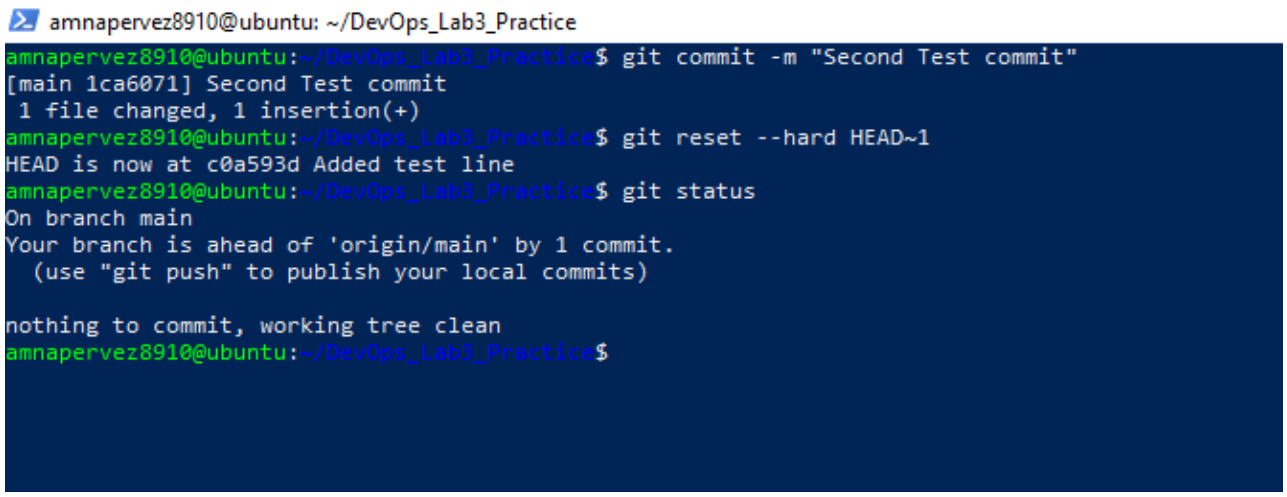

Task 6: Soft and Hard Reset (continued)

file_after_soft_reset.png

Both file edits remain after the soft reset.

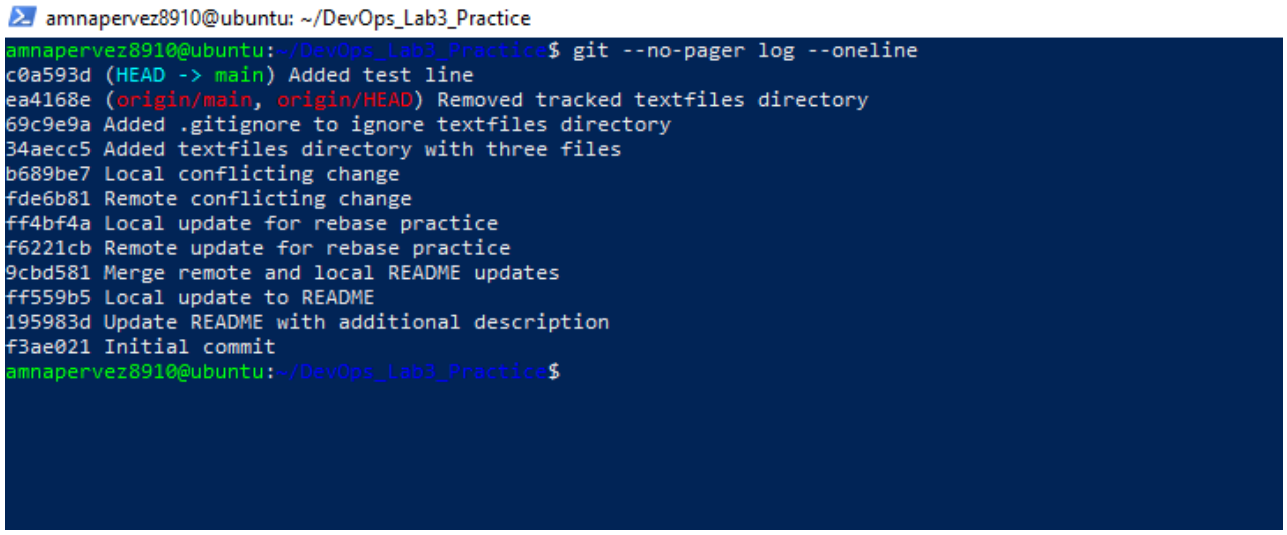

hard_reset.png

Second change recommitted, then hard-reset; clean status verified.

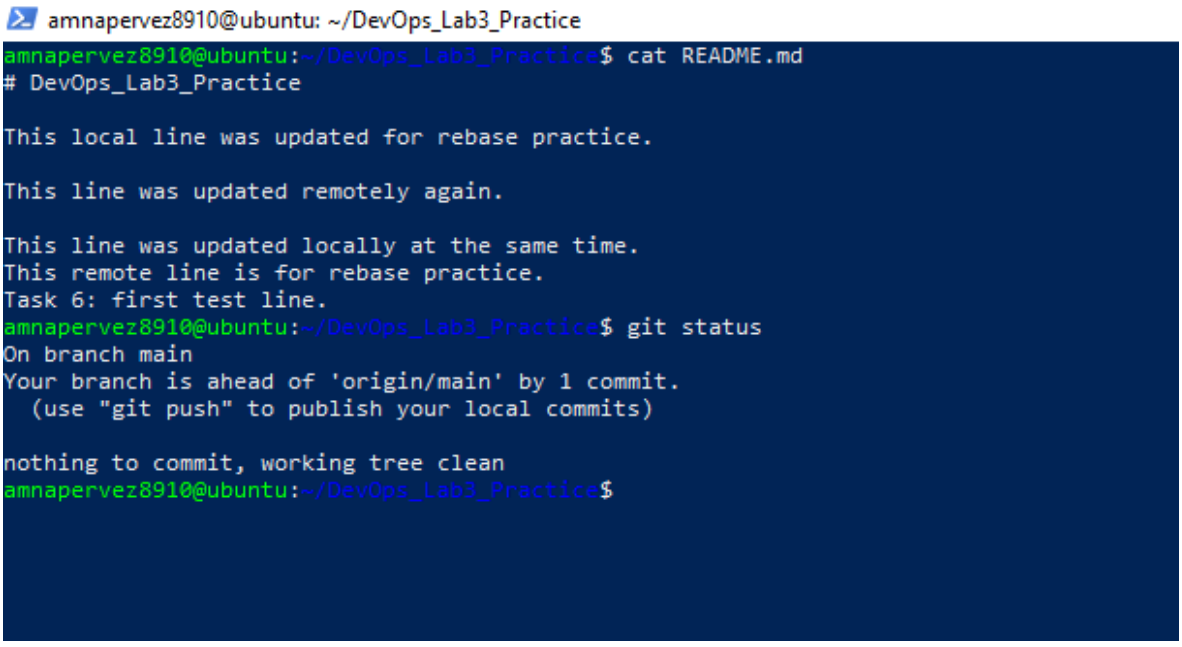

Task 6: Soft and Hard Reset (continued)

log_after_hard_reset.png

Branch history checked after the hard reset.

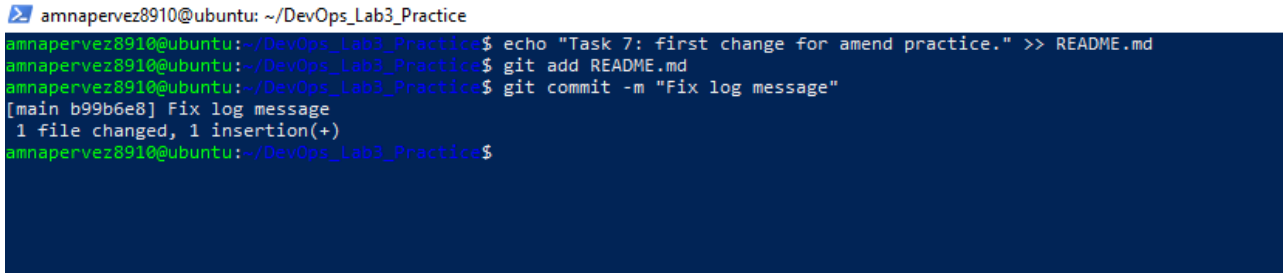

file_after_hard_reset.png

Second test line is absent; first test line remains and working tree is clean.

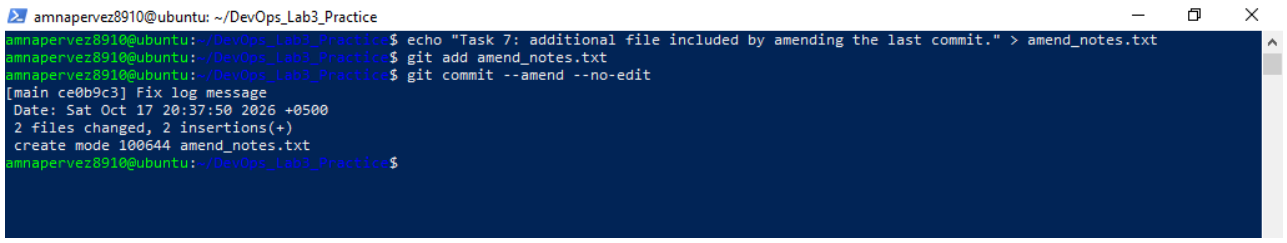

Task 7: Amending the Last Commit

first_amend_commit.png

Initial change committed before amending.

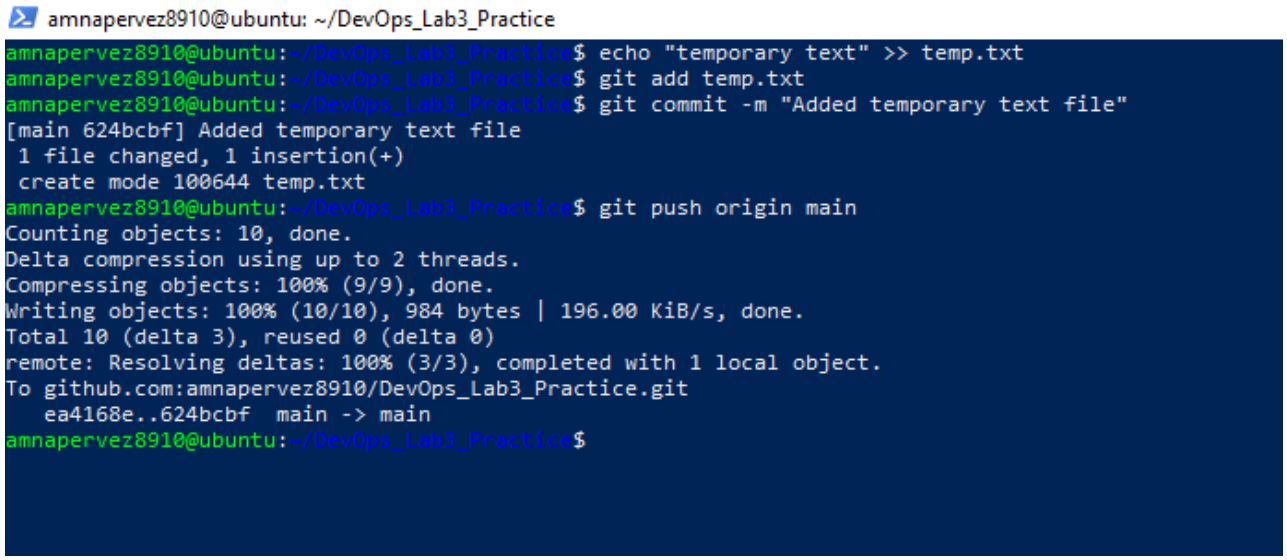

amend_commit.png

Additional file included by amending the most recent commit.

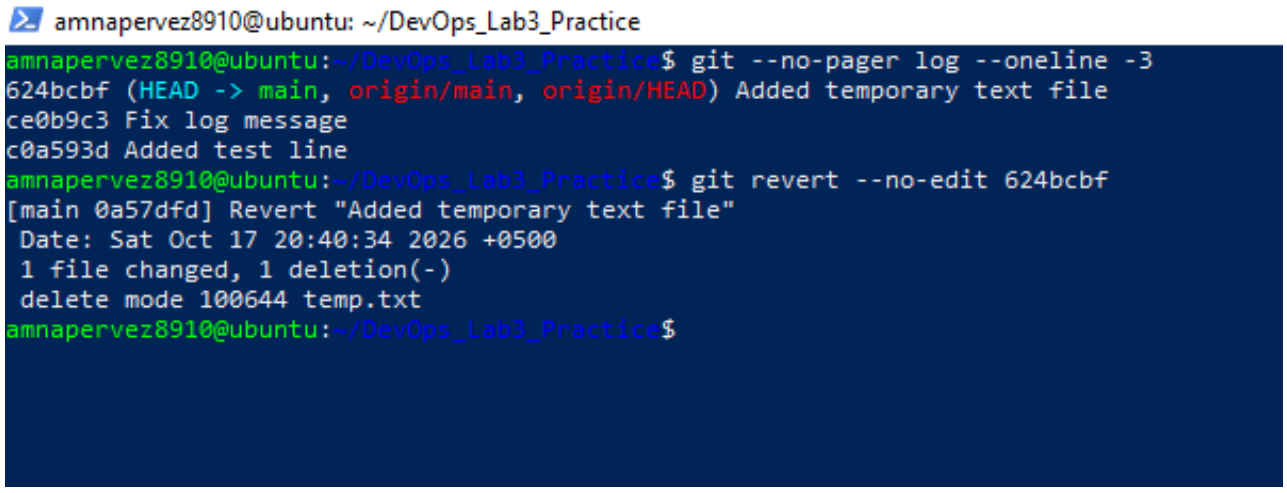

Task 8: Reverting a Published Commit

commit_temp_file.png

Temporary text file committed and pushed.

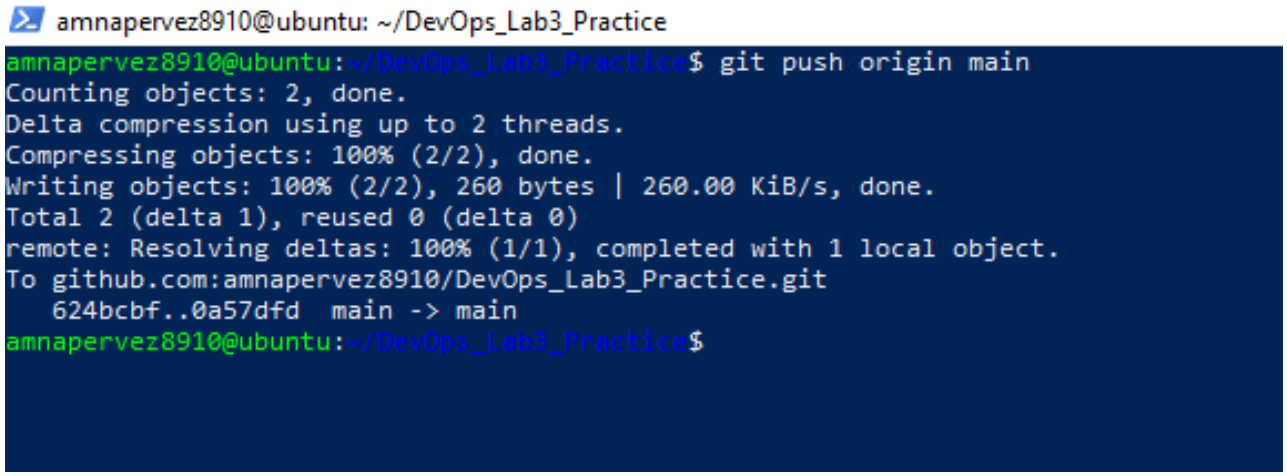

revert_commit.png

A new revert commit safely undoes the temporary-file commit.

Task 8: Reverting a Published Commit (continued)

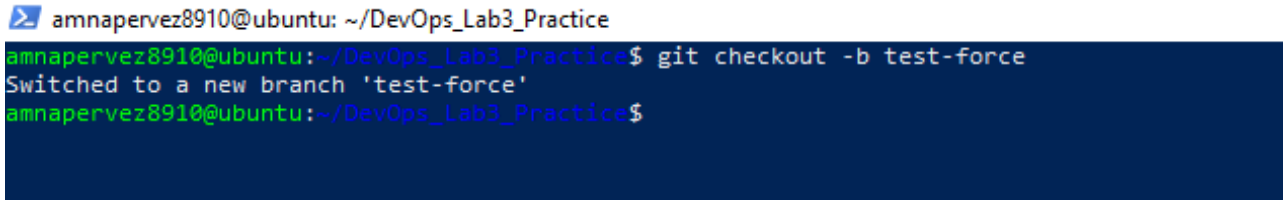

revert_push.png

Revert commit successfully pushed without rewriting remote history.

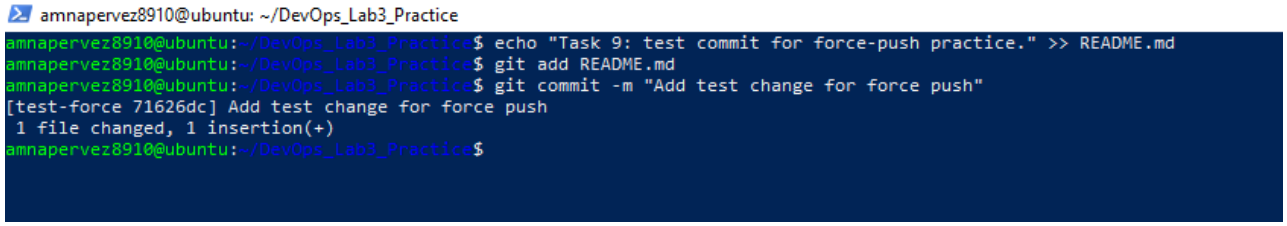

Task 9: Force Push on a Practice Branch

new_branch.png

Dedicated test-force branch created.

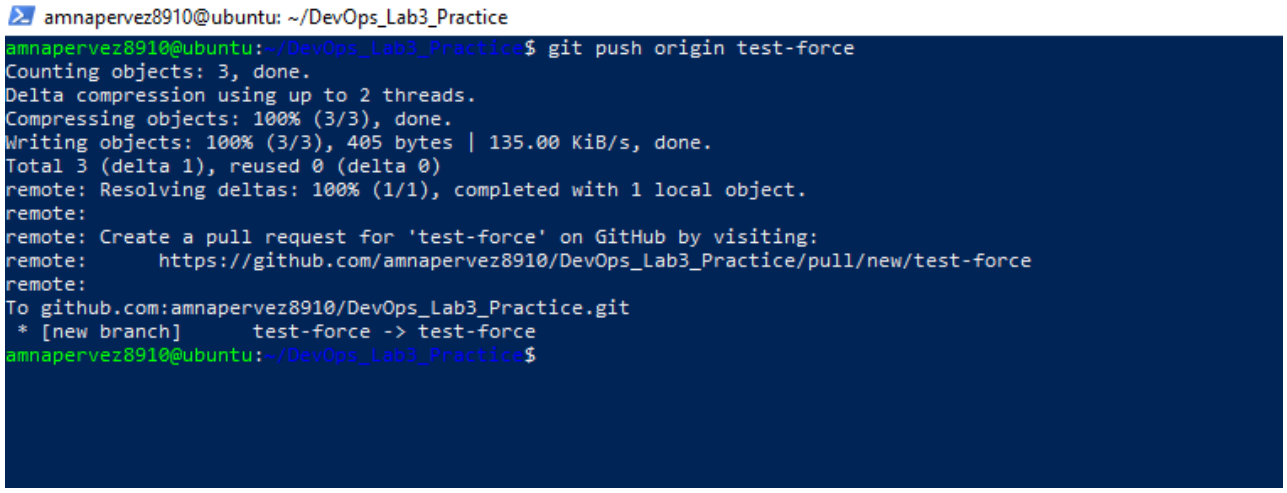

force_commit.png

Test change committed on test-force.

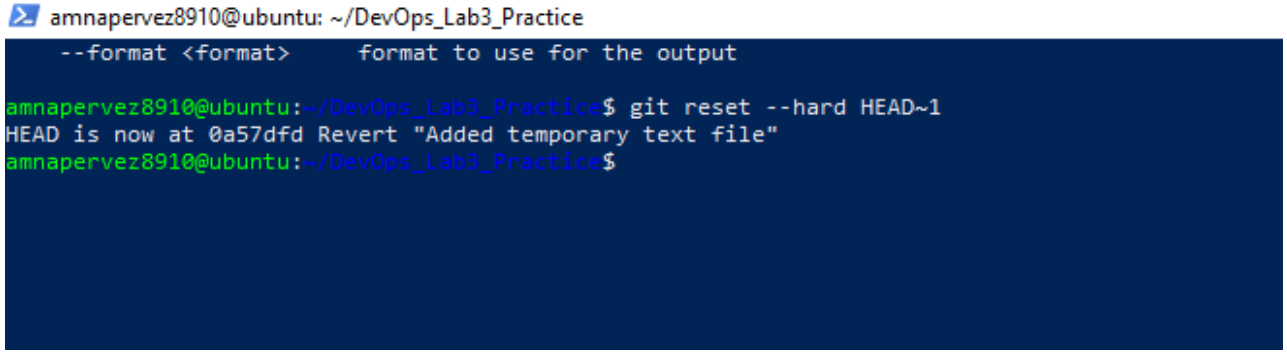

Task 9: Force Push on a Practice Branch (continued)

push_force_branch.png

Practice branch pushed to GitHub.

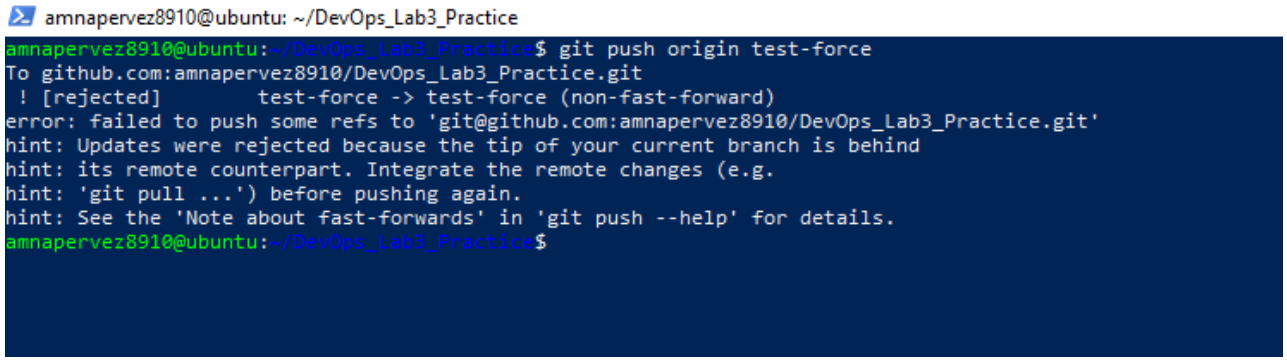

hard_reset_force.png

Practice branch reset to the preceding commit.

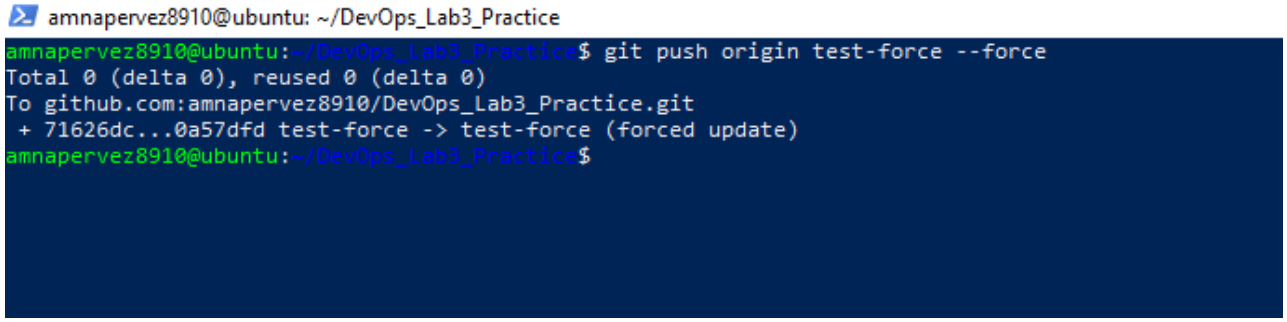

Task 9: Force Push on a Practice Branch (continued)

normal_push.png

Normal push rejected as non-fast-forward after the reset.

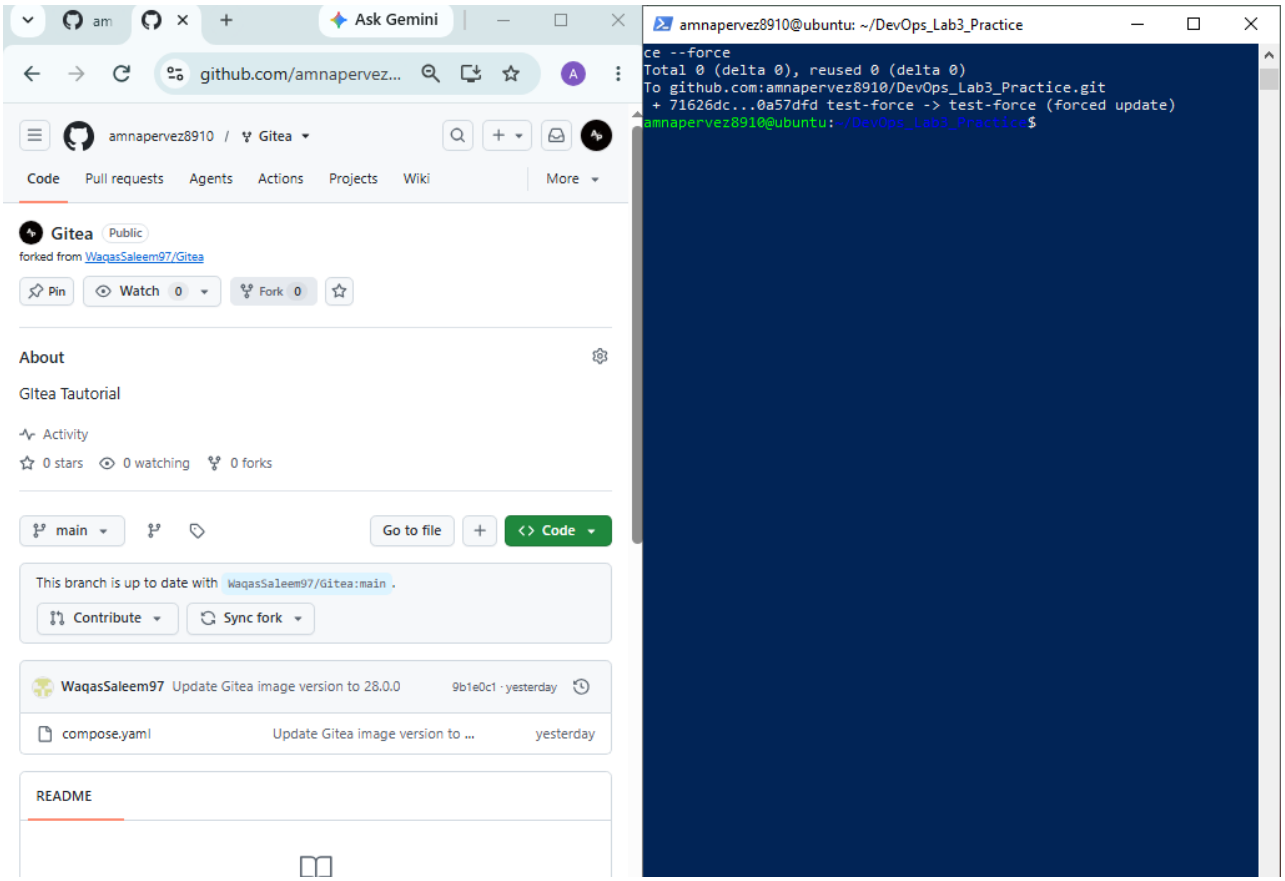

force_push.png

Force push updates only the test-force remote branch.

Task 10: Gitea in GitHub Codespaces

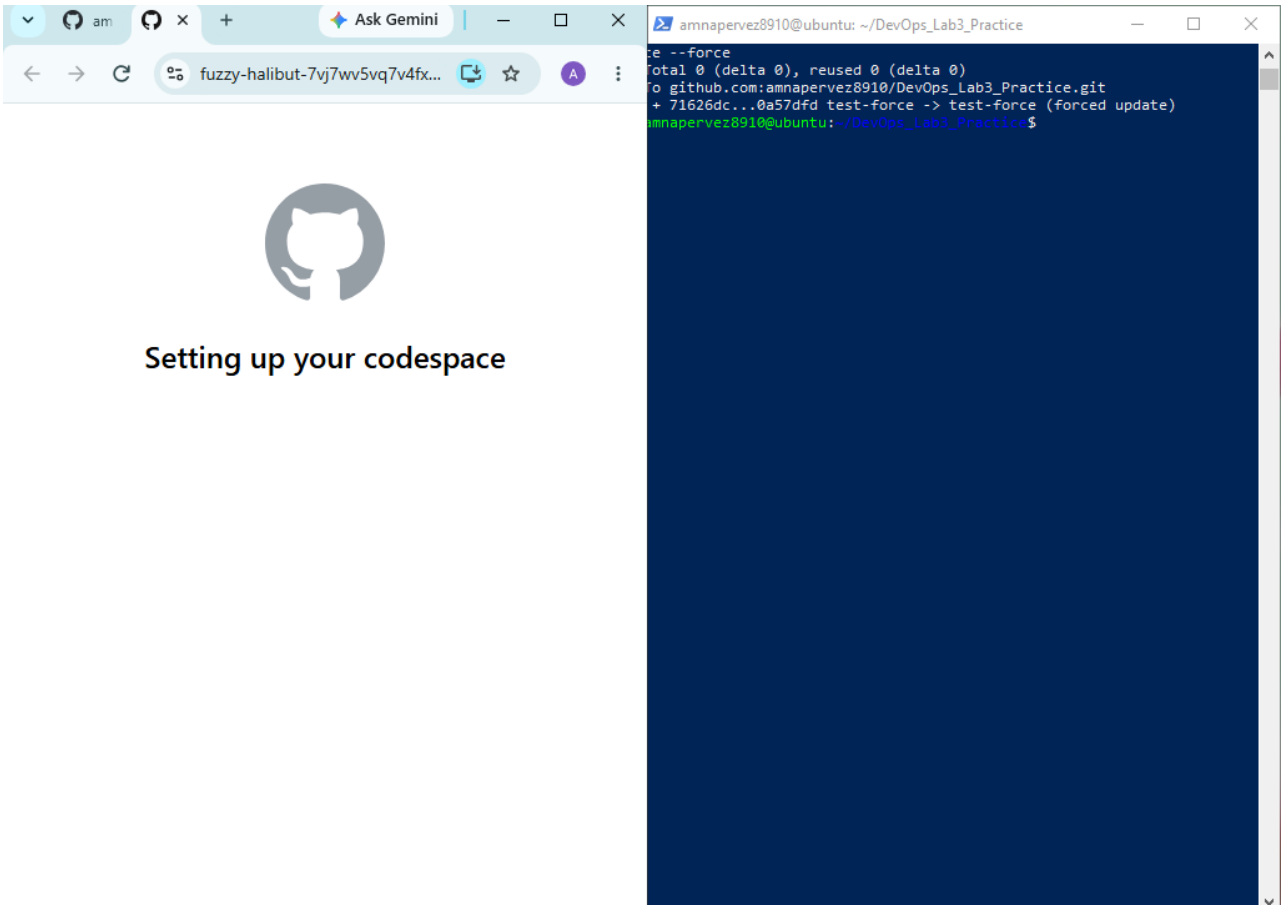

forked_gitea.png

Gitea repository forked into the student account.

Task 10: Gitea in GitHub Codespaces (continued)

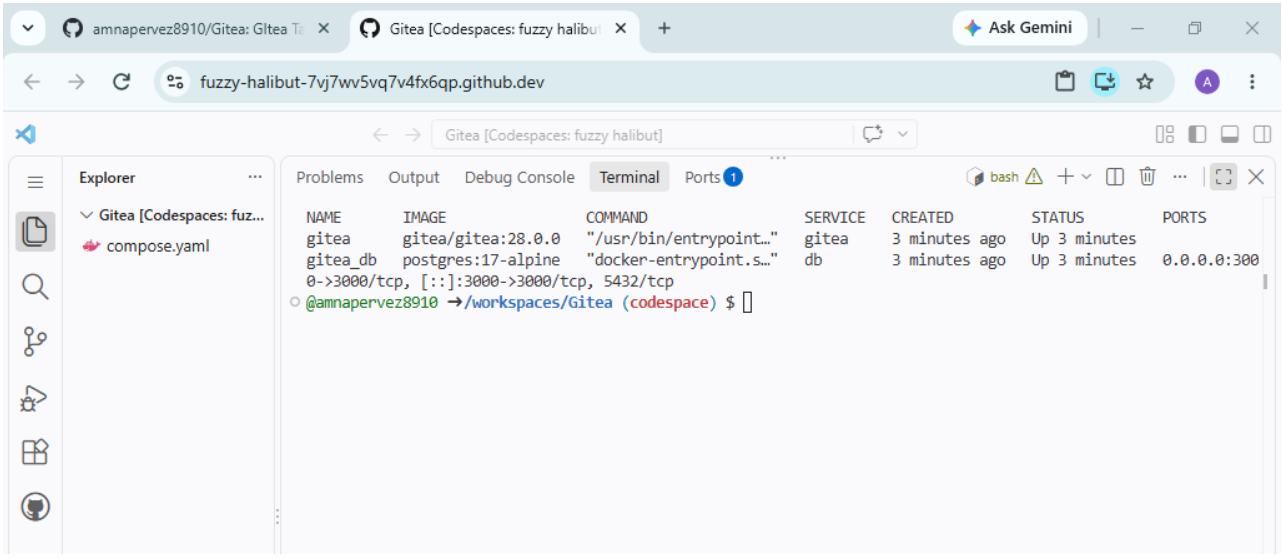

codespace_loading.png

GitHub Codespace being provisioned.

Task 10: Gitea in GitHub Codespaces (continued)

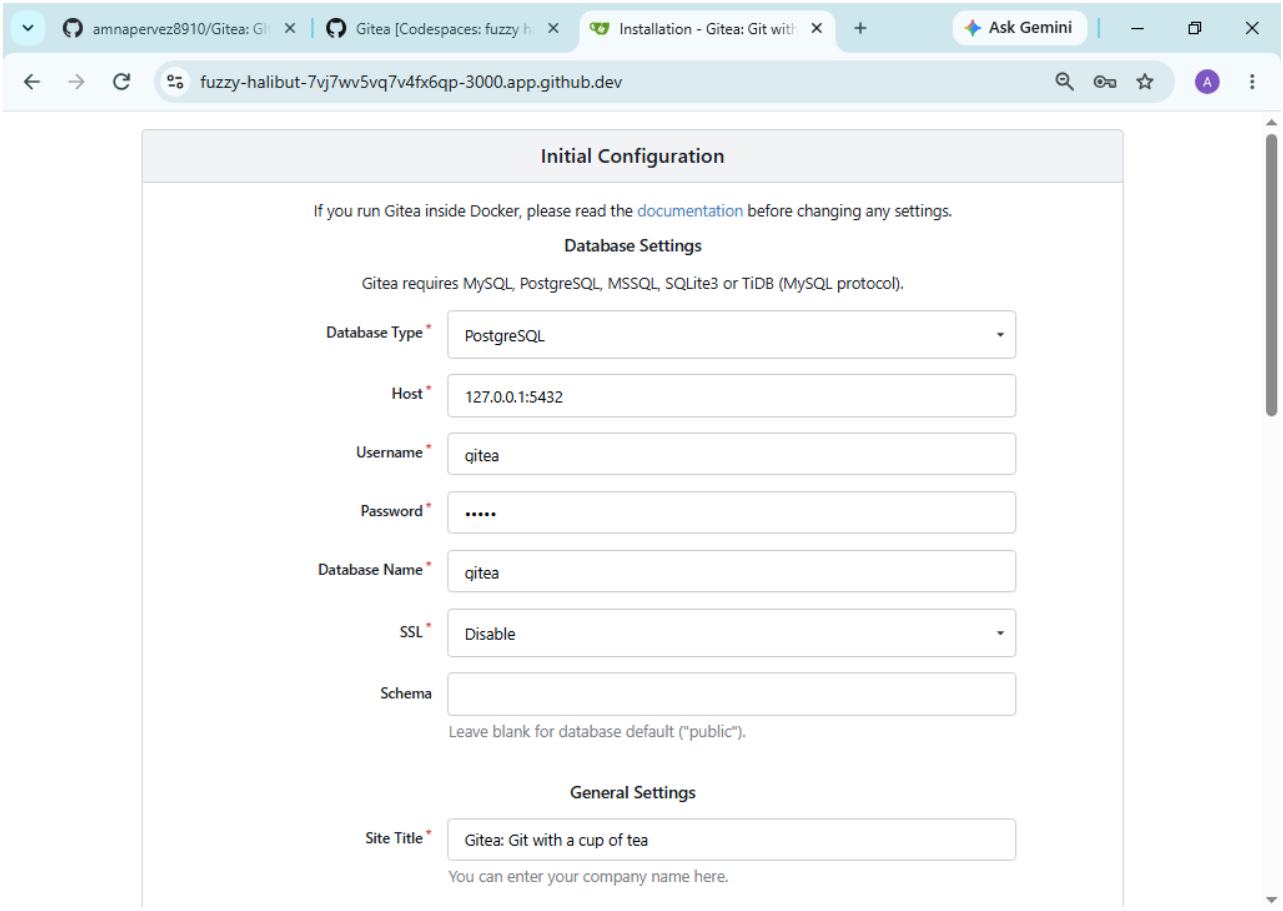

docker_up.png

Docker Compose service status shows Gitea and PostgreSQL running.

Task 10: Gitea in GitHub Codespaces (continued)

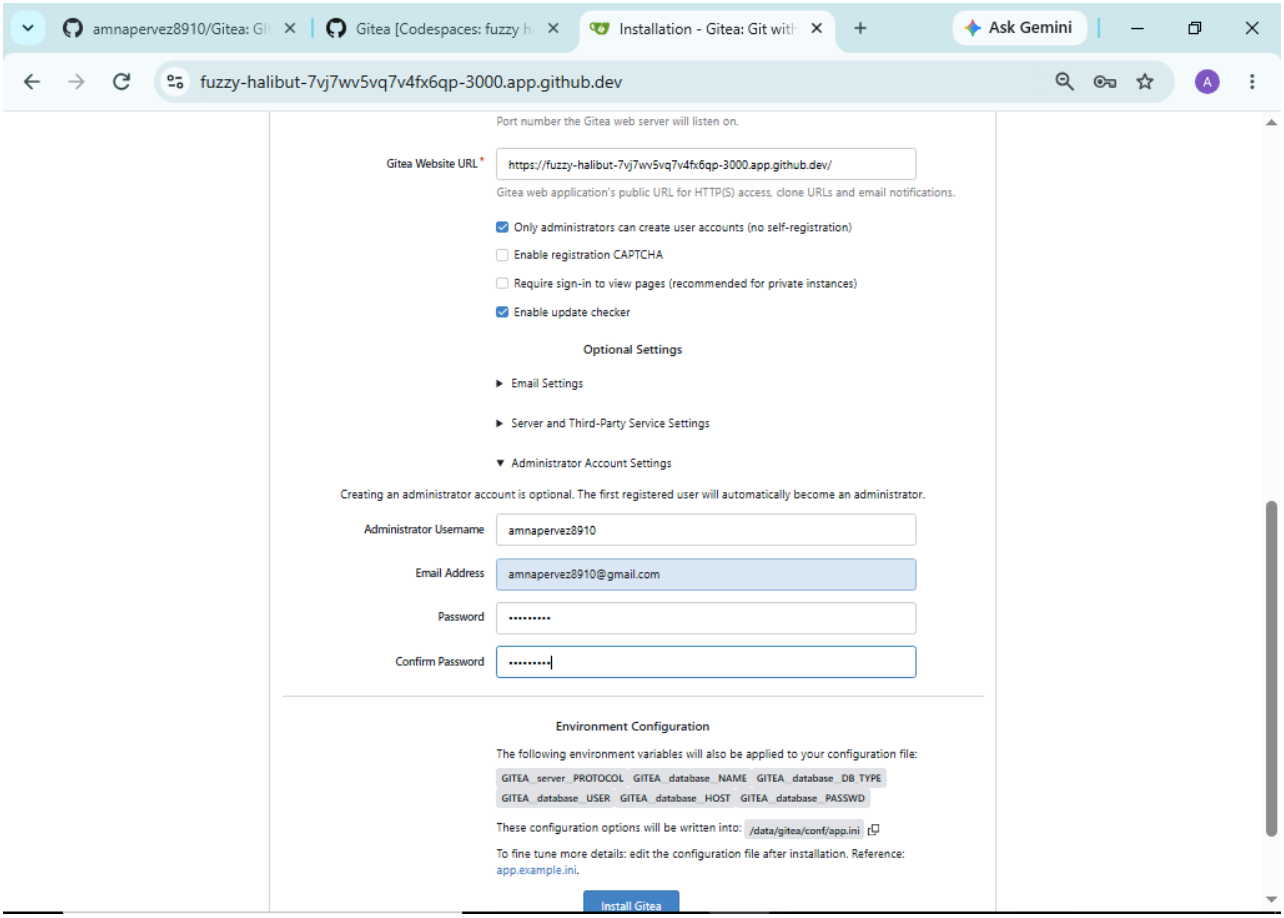

gitea_install_page.png

Gitea initial installation form opened.

Task 10: Gitea in GitHub Codespaces (continued)

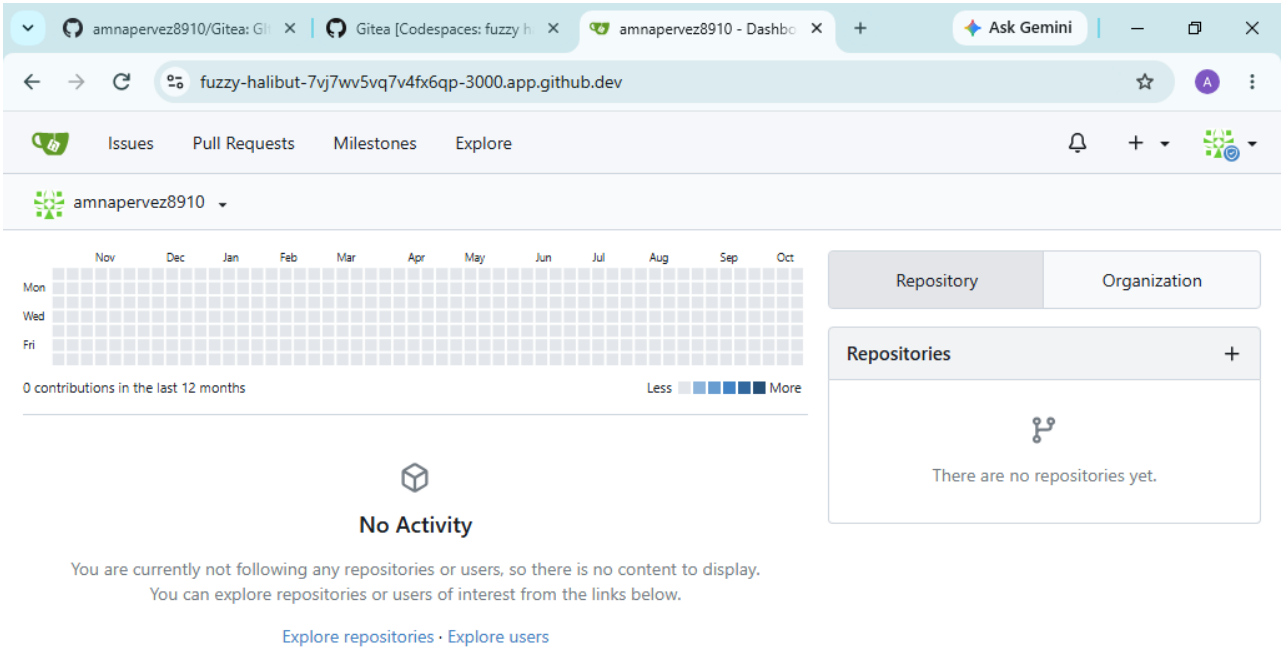

admin_setup.png

Administrator setup completed in the form; passwords remain masked.

Task 10: Gitea in GitHub Codespaces (continued)

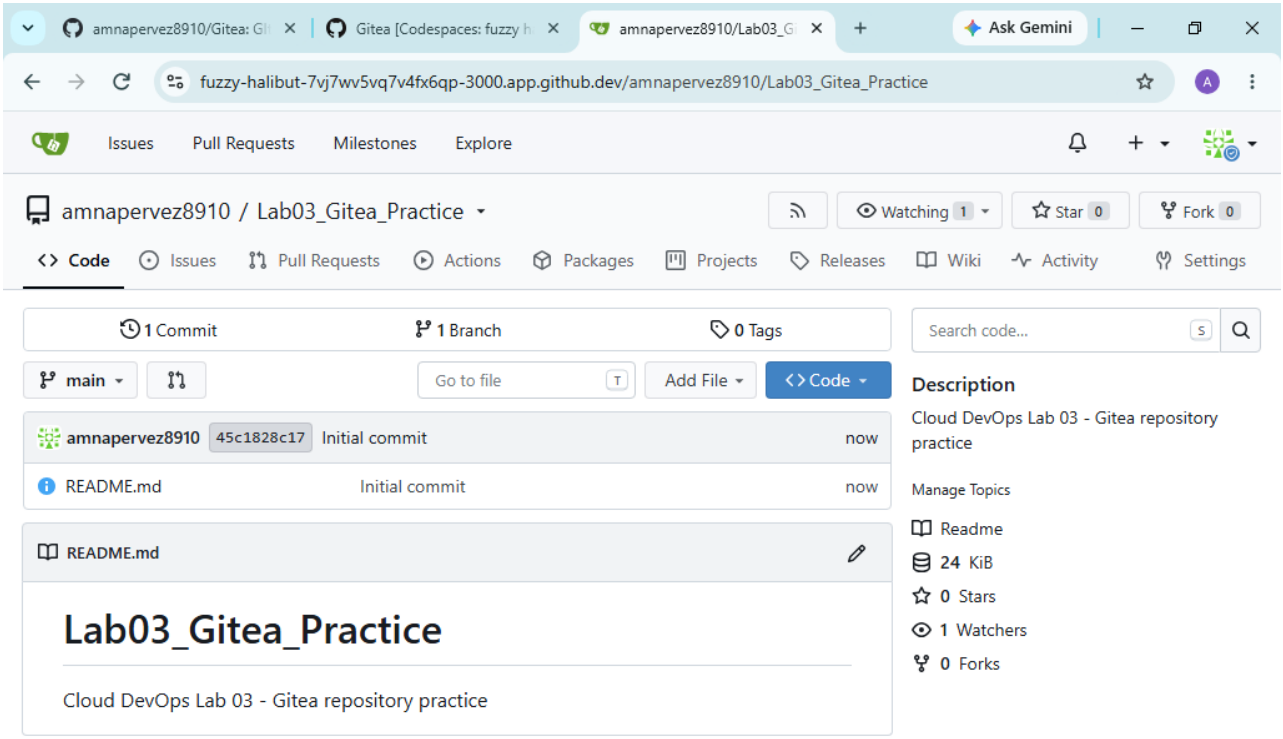

gitea_dashboard.png

Gitea dashboard opened with the administrator signed in.

Task 10: Gitea in GitHub Codespaces (continued)

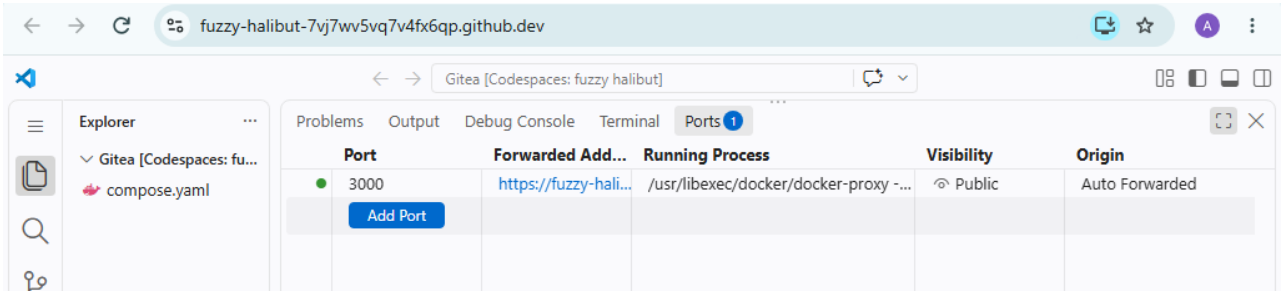

gitea_new_repo.png

Lab03_Gitea_Practice repository created with an initial README.

Task 10: Gitea in GitHub Codespaces (continued)

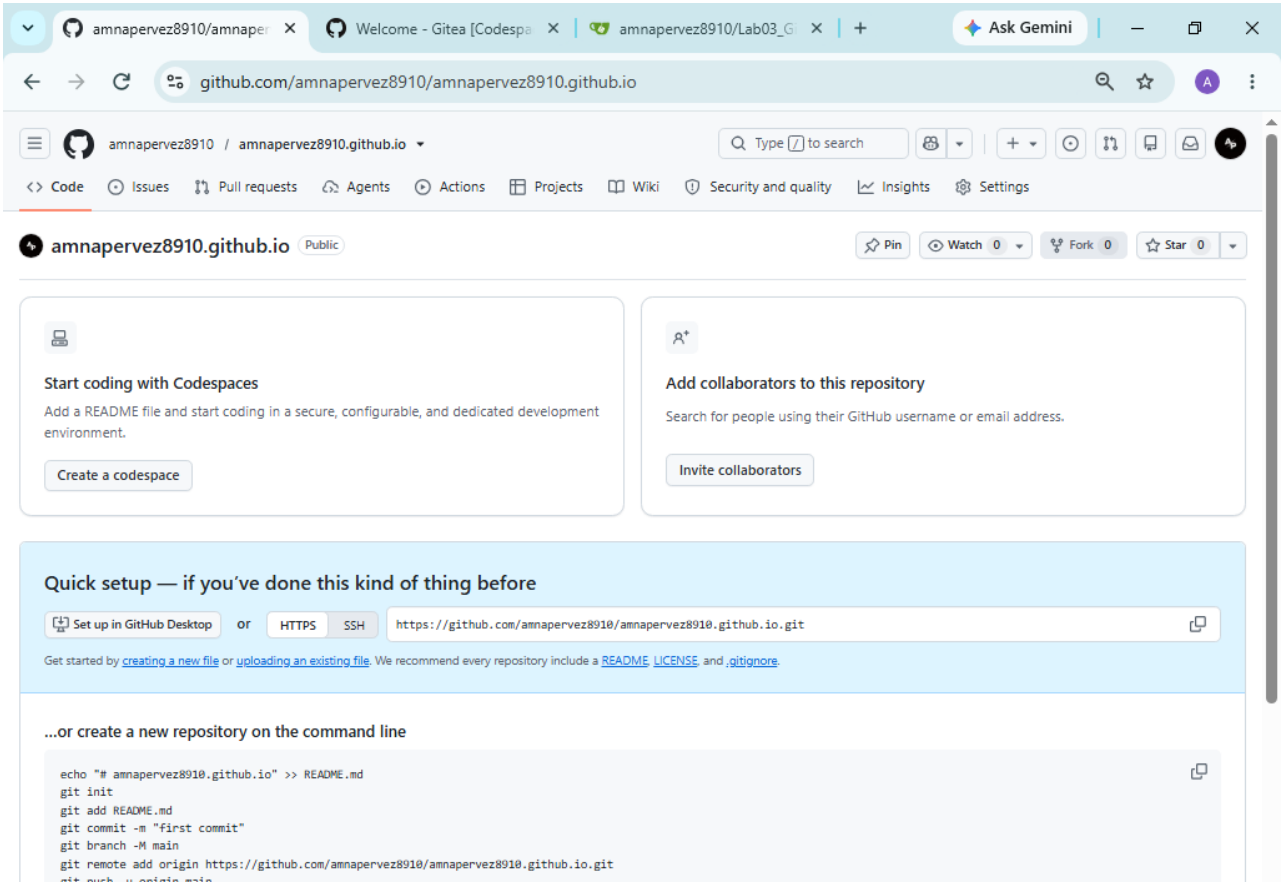

port_3000_public.png

Forwarded port 3000 configured with Public visibility.

Task 11: GitHub Pages Portfolio

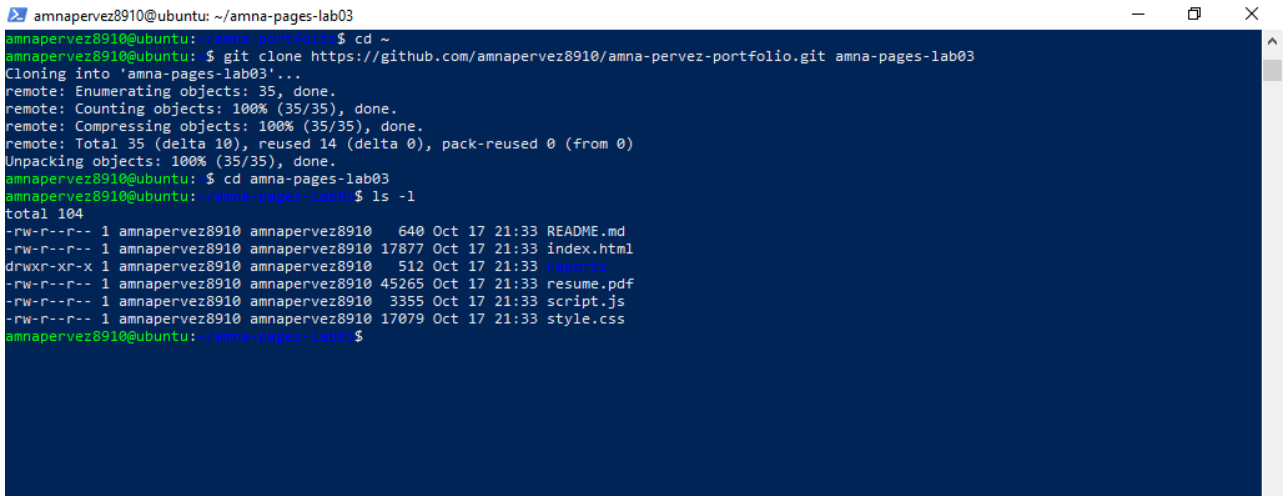

github_pages_repo.png

Public username.github.io repository created.

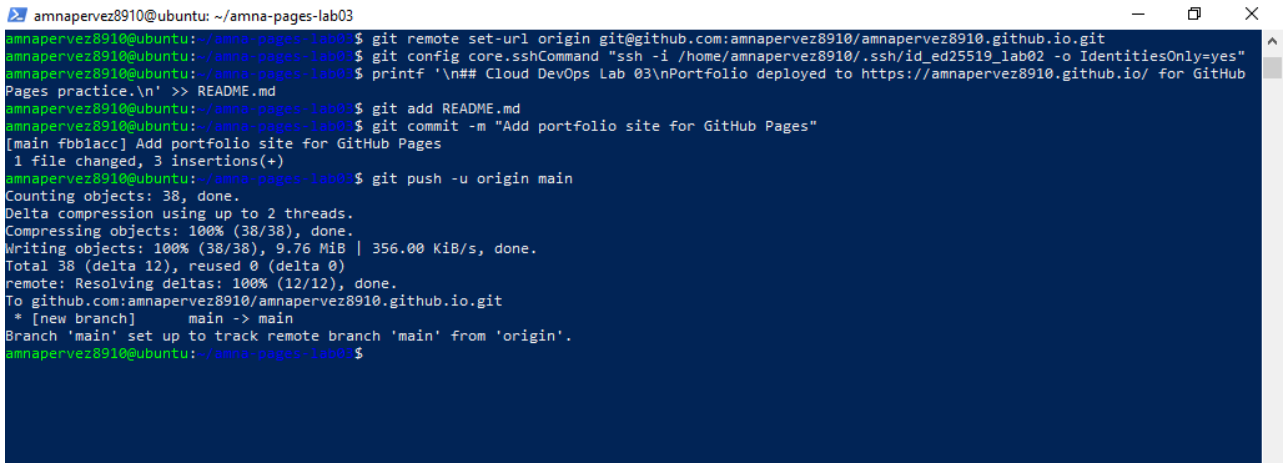

Task 11: GitHub Pages Portfolio (continued)

local_static_site.png

Existing personal portfolio cloned locally for reuse with instructor permission.

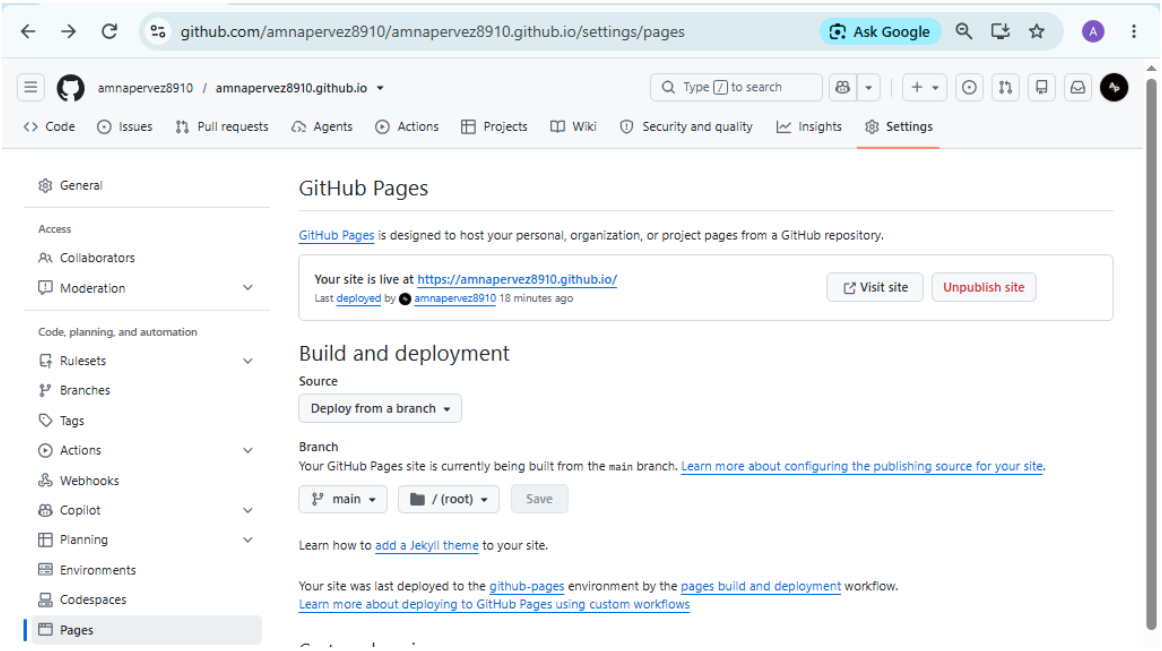

push_static_site.png

Portfolio pushed to the username.github.io repository.

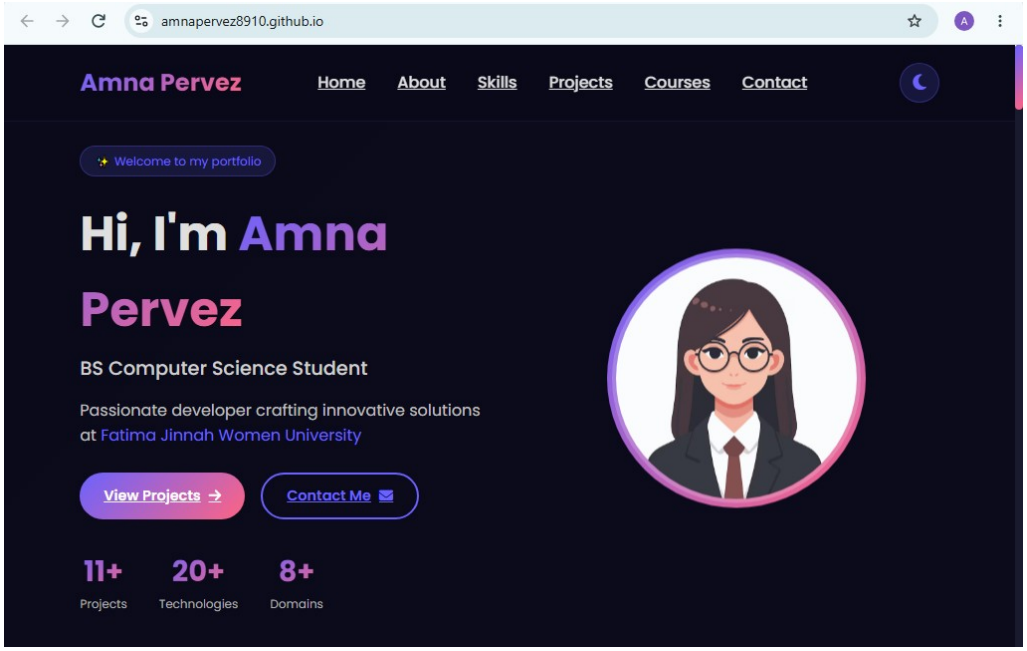

Task 11: GitHub Pages Portfolio (continued)

github_pages_settings.png

GitHub Pages confirms publication from main and the root folder.

live_site.png

Personal portfolio live at https://amnapervez8910.github.io/.
